NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-361 and 50-362]

Southern California Edison Company; San Onofre Nuclear Generating Station, Units 2 and 3; Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License No. NPF-10 and Facility Operating License No. NPF-15 for San Onofre Nuclear Generating Station (SONGS), Units 2 and 3, respectively.

The proposed amendments would revise the SONGS Units 2 and 3 technical specifications (TSs) applicable in shutdown MODES relating to positive reactivity additions. For a summary of specific proposed TS changes, see Tables 1 and 2 of the licensee's application dated September 22, 2000 (PCN-520). The licensee's proposal generally conforms to industry Technical Specification Task Force (TSTF), TSTF-286, Revision 2.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendments request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of any accident previously evaluated?

Response: No.

The proposed change would revise 14 specific Limiting Conditions For Operation (LCOs) of the Technical Specifications (TS) for San Onofre Nuclear Generating Station Units 2 and 3 (SONGS 2 & 3) as itemized in Table 1 [See application dated September 22,
