

0.825 meters (32.5 inches) from the other end of the container, measured horizontally along a line parallel to the longitudinal axis of the container.

(3) Position a CNG fuel container that is fitted with pressure relief devices at more than one location along its length so that the portion of container over the center of the fire source is the portion midway between the two pressure relief devices that are separated by the greatest distance, measured horizontally along a line parallel to the longitudinal axis of the container.

(4) Test a CNG fuel container that is greater than 1.65 meters (65 inches) in length, is protected by thermal insulation, and does not have pressure relief devices, twice at 100 percent of service pressure. In one test, position

the center of the container over the center of the fire source. In another test, position one end of the container so that the fire source is centered 0.825 meters (32.5 inches) from one end of the container, measured horizontally along a line parallel to the longitudinal axis of the container.

S8.3.3 *Number and placement of thermocouples.* To monitor flame temperature, place three thermocouples so that they are suspended 25 mm (one inch) below the bottom of the CNG fuel container. Position thermocouples so that they are equally spaced over the length of the fire source or length of the container, whichever is shorter.

#### S8.3.4 *Shielding.*

(a) Use shielding to prevent the flame from directly contacting the CNG fuel

container valves, fittings, or pressure relief devices.

(b) To provide the shielding, use steel with 0.6 mm (.025 in) minimum nominal thickness.

(c) Position the shielding so that it does not directly contact the CNG fuel container valves, fittings, or pressure relief devices.

S8.3.5 *Fire source.* Use a uniform fire source that is 1.65 meters long (65 inches). Beginning five minutes after the fire is ignited, maintain an average flame temperature of not less than 430 degrees Celsius (800 degrees Fahrenheit) as determined by the average of the two thermocouples recording the highest temperatures over a 60 second interval:

$$\frac{1}{2} \left[ \left( \frac{T_{\text{High 1}} + T_{\text{High 2}}}{2} \right)_{@ \text{ time 30 sec}} + \left( \frac{T_{\text{High 1}} + T_{\text{High 2}}}{2} \right)_{@ \text{ time 60 sec}} \right] \geq 430^{\circ} \text{C}$$

If the pressure relief device releases before the end of the fifth minute after ignition, then the minimum temperature requirement does not apply.

S8.3.6 *Recording data.* Record time, temperature, and pressure readings at 30 second intervals, beginning when the fire is ignited and continuing until the pressure release device releases.

S8.3.7 *Duration of exposure to fire source.* The CNG fuel container is exposed to the fire source for 20 minutes after ignition or until the pressure release device releases, whichever period is shorter.

S8.3.8 *Number of tests per container.* A single CNG fuel container is not subjected to more than one bonfire test.

S8.3.9 *Wind velocity.* The average ambient wind velocity at the CNG fuel container during the period specified in S8.3.6 of this standard is not to exceed 2.24 meters/second (5 mph).

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### 50 CFR Part 648

[Docket No. 000119014-0137-02; I.D. 091800G]

#### Fisheries of the Northeastern United States; Black Sea Bass Fishery; Commercial Quota Harvested for Quarter 4 Period

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Closure; Quarter 4 commercial black sea bass fishery.

**SUMMARY:** NMFS announces that the black sea bass commercial quota available in the quarter 4 period to the coastal states from Maine through North Carolina has been harvested. Commercial vessels may not land black sea bass in the Northeast region for the remainder of the 2000 quarter 4 quota period (through December 31, 2000). Regulations governing the black sea bass fishery require publication of this notification to advise the coastal states from Maine through North Carolina that the quota has been harvested and to advise vessel permit holders and dealer permit holders that no commercial quota is available for landing black sea bass in these states north of 35°15.3' N. lat.

**DATES:** Effective 0001 hrs local time, November 1, 2000, through 2400 hrs local time, December 31, 2000.

#### FOR FURTHER INFORMATION CONTACT:

Jennifer L. Anderson, Fishery Management Specialist, at (978) 281-9226.

#### SUPPLEMENTARY INFORMATION:

Regulations governing the black sea bass fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is allocated into four quota periods based upon percentages of the annual quota. The quarter 4 (October through December) commercial quota is distributed to the coastal states from Maine through North Carolina. The process to set the annual commercial quota is described in § 648.140.

The initial total commercial quota for black sea bass for the 2000 calendar year was 3,024,742 lb (1,372,000 kg) (65 FR 33486, May 24, 2000). The quarter 4 period quota, which is equal to 19.77 percent of the annual commercial quota, was 540,170 lb (245,017 kg). The quota allocation was adjusted downward (65 FR 50465, August 18, 2000) to compensate for 1999 quarter 4 landings in excess of the 1999 quarter 4 quota, consistent with the procedures in § 648.140. The final adjusted quarter 4 quota was 450,661 lb (204,416 kg).

Section 648.141 requires the Regional Administrator, Northeast Region, NMFS (Regional Administrator), to monitor the commercial black sea bass quota for each quota period on the basis of dealer reports, state data, and other available information to determine when the

commercial quota has been harvested. NMFS is required to publish a notification in the Federal Register advising and notifying commercial vessels and dealer permit holders that, effective upon a specific date, the black sea bass commercial quota has been harvested and no commercial quota is available for landing black sea bass for the remainder of the quarter 4 period, north of 35°15.3' N. lat. The Regional Administrator has determined, based upon dealer reports and other available information, that the black sea bass commercial quota for the 2000 quarter 4 period has been harvested.

The regulations at § 648.4(b) provide that Federal black sea bass moratorium permit holders agree as a condition of the permit not to land black sea bass in any state after NMFS has published a notification in the **Federal Register** stating that the commercial quota for the period has been harvested and that no commercial quota for the black sea bass is available. The Regional Administrator has determined that the quarter 4 period for black sea bass no longer has commercial quota available. Therefore,

effective 0001 hrs local time, November 1, 2000, further landings of black sea bass in coastal states from Maine through North Carolina, north of 35°15.3' N. lat., by vessels holding commercial Federal fisheries permits are prohibited through December 31, 2000. The 2001 quarter 1 period for commercial black sea bass harvest will open on January 1, 2001. Effective November 1, 2000, federally permitted dealers are also advised that they may not purchase black sea bass from federally permitted black sea bass moratorium permit holders who land in coastal states from Maine through North Carolina, north of 35°15.3' N. lat., for the remainder of the quarter 4 period (through December 31, 2000).

The regulations at § 648.4(b) also provide that, if the commercial black sea bass quota for a period is harvested and the coast is closed to the possession of black sea bass north of 35°15.3' N. lat., any vessel owners who hold valid commercial permits for both the black sea bass and the NMFS Southeast Region Snapper-Grouper fisheries may surrender their black sea bass

moratorium permit by certified mail addressed to the Regional Administrator (see table 1 at § 600.502) and fish pursuant to their Snapper-Grouper permit, as long as fishing is conducted exclusively in waters, and landings are made, south of 35°15.3' N. lat. A moratorium permit for the black sea bass fishery that is voluntarily relinquished or surrendered will be reissued upon the receipt of the vessel owner's written request after a minimum period of 6 months from the date of cancellation.

#### Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

**Authority:** 16 U.S.C. 1801 *et seq.*
