

2.2 Optional Higher Package Minimums

A mailer may choose to prepare carrier route packages at a higher level of route saturation (for example, only if there are at least 15 pieces per route). Under this option, smaller groups of six or more pieces per carrier route not prepared in carrier route packages for carrier route rates must be prepared for and paid at another applicable rate.

2.3 Walk-Sequence Identification

In addition to the package label showing carrier route type and number under 2.4, each package of Periodicals walk-sequence mail must show that the mail is walk sequenced and the level of sequencing. A facing slip with the phrase "HIGH DENSITY WALK-SEQUENCED CARRIER ROUTE MAIL" or "SATURATION WALK-SEQUENCED CARRIER ROUTE MAIL" (as applicable) may be placed on the top of each package of walk-sequence mail. It may be an address label with the required information placed on a sample mailpiece that is the top piece in the package, or a slip of paper affixed to the top of the package. If packages are prepared without facing slips, an optional endorsement line or carrier route information line must be placed on each piece in the package to provide the equivalent information.

2.4 Package Preparation

Package size, preparation sequence, and labeling:

- a. Firm: optional (two-piece minimum); blue Label F or optional endorsement line (OEL).
- b. Carrier route: optional but required for rate eligibility (six-piece minimum, fewer not permitted except under 1.5); labeling required except for packages placed in a direct carrier route tray or sack (facing slip, OEL, or CR information line).

3.0 TRAY PREPARATION (LETTER-SIZE PIECES)

Tray size, preparation sequence, and Line 1 and 2 labeling:

- a. Carrier route: required for rate eligibility at 24 pieces, optional with one six-piece package minimum.

(1) Line 1: use 5-digit ZIP Code destination of packages, preceded for military mail by the prefixes under M031.

(2) Line 2: "PER" or "NEWS," as applicable, followed by "LTRS," followed by "WSS" for saturation rate mail, or "WSH" for high density rate mail, or "CR" for basic rate mail, and followed by the route type and number.

b. 5-digit carrier routes: required for rate eligibility if full tray, optional with minimum one six-piece package.

(1) Line 1: use 5-digit ZIP Code destination of packages, preceded for military mail by the prefixes under M031.

(2) Line 2: "PER" or "NEWS," as applicable, followed by "LTRS CR-RTS."

c. 3-digit carrier routes: optional with minimum one six-piece package for each of two or more 5-digit areas.

(1) Line 1: use the city/state/ZIP shown in L002, Column A that corresponds to the 3-digit ZIP Code prefix of packages.

(2) Line 2: "PER" or "NEWS," as applicable, followed by "LTRS 3D CR-RTS."

4.0 SACK PREPARATION (FLAT-SIZE PIECES AND IRREGULAR PARCELS)

Sack size, preparation sequence, and Line 1 and 2 labeling:

- a. Carrier route: required for rate eligibility at 24 pieces, fewer pieces not permitted.

(1) Line 1: use 5-digit ZIP Code destination of packages, preceded for military mail by the prefixes under M031.

(2) Line 2: "PER" or "NEWS" as applicable, followed by "FLTS" or "IRREG" as applicable, followed by "WSS" for saturation rate mail, or "WSH" for high density rate mail, or "CR" for basic rate mail, and followed by the route type and number.

b. 5-digit scheme carrier routes: required for rate eligibility (no minimum).

(1) Line 1: use L001, Column B.

(2) Line 2: "PER" or "NEWS" as applicable, followed by "FLTS" or "IRREG" as applicable, followed by "CR-RTS SCH."

SUPPLEMENTARY INFORMATION:

Background

On June 1, 2000, the Service published a proposed rule to list three plants from the Mariana Islands and Guam as endangered species, pursuant to the Endangered Species Act of 1973, as amended (Act) in the **Federal Register** (65 FR 35025). The original comment period closed on July 17, 2000. The comment period now closes on November 29, 2000. Written comments should be submitted to the Service (see **ADDRESSES** section).

Nesogenes rotensis and *Osmoxylon marianense* are found only on the island of Rota, Commonwealth of the Northern Mariana Islands (CNMI).

Tabernaemontana rotensis occurs on both Rota and the United States Territory of Guam. The three plant species and their habitats have been affected or are now threatened by fire, development/road work, typhoons/storms, nonnative plants, and collecting/trampling by humans. This proposal, if made final, would implement the Federal protection and recovery provisions of the Act.

Section 4(b)(5)(E) of the Act (16 U.S.C. 1531 *et seq.*), requires that a public hearing be held if it is requested within 45 days of the publication of a proposed rule. In response to a request from a government agency of the CNMI, the Service will hold a public hearing on the date and at the address described in the **DATES** and **ADDRESSES** sections above.

Anyone wishing to make an oral statement for the record is encouraged to provide a written copy of their statement and present it to the Service at the hearing. In the event there is a large attendance, the time allotted for oral statements may be limited. Oral and written statements receive equal consideration. There are no limits to the length of written comments presented at the hearing or mailed to the Service. Legal notices announcing the date, time, and location of the hearing will be published in newspapers concurrently with the **Federal Register** notice.

Comments from the public regarding the accuracy of this proposed rule are sought, especially regarding:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to these species;

(2) The location of any additional populations of these species and reasons why any habitat should or should not be designated as critical habitat;

(3) Additional information on the range, distribution, and population size of these species; and
