SUPPLEMENTARY INFORMATION:

Title: NESHAP Subpart S, Pulp and Paper Industry, OMB Control No. 2060-0377; EPA ICR No. 1805.02, expiring 12/31/2000. This is a request for extension of a currently approved collection.

Abstract: This NESHAP standard requires initial notification, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required, in general, of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least 5 years following the date of such measurements, maintain reports, and records. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office. This information is being collected to assure compliance with 40 CFR part 63, subpart S as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information, was published on April 18, 2000. No comments were received. **Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 463 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize

technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirement; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and Operators of Pulp and Paper Mills.

Estimated Number of Responses: 158.

Frequency of Response: 2.

Estimated Total Annual Hour Burden: 146,401.

Estimated Total Annualized Capital and Operating & Maintenance Cost Burden: \$2,003,500.

Dated: October 24, 2000.

Oscar Morales,

Director, Collection Strategies Division.

Agency Information Collection Activities: Submission for OMB Review; Comment Request, New Source Performance Standards (NSPS) for Nitric Acid Plants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: New Source Performance Standards for Nitric Acid Plants, subpart G, 40 CFR part 60, OMB Control Number 2060-0019, expiration date, November 30, 2000. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before December 4, 2000.

ADDRESSES: Send comments, referencing EPA ICR No. 1056.07 and OMB Control No. 2060-0019, to the following addresses: Sandy Farmer, U.S. Environmental Protection Agency, Collection Strategies Division (Mail

Code 2822), 1200 Pennsylvania Avenue, N.W., Washington, DC 20460; and to Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, N.W., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: For a copy of the ICR contact Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1056.07. For technical questions about the ICR contact: Sandra Jones at 202/564-7038, Office of Compliance.

SUPPLEMENTARY INFORMATION:

Title: NSPS Subpart G, Nitric Acid Plants, OMB Control No. 2060-0019; EPA ICR No. 1056.07, expiring, November 30, 2000. This is a request for an extension of a currently approved collection.

Abstract: This ICR contains monitoring, recordkeeping and reporting requirements that are mandatory for compliance with 40 CFR part 60, NSPS subpart G, Nitric Acid Plants. This information is used by the Agency to identify sources subject to the standards to insure that the best demonstrated technology is being properly applied. The standards require periodic recordkeeping to document process information relating to the source's ability to meet the requirements of the standard and to note the operation conditions under which compliance was achieved.

In the Administrators judgement, VOC emissions from the nitric acid plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category.

Owners or operators of the affected facilities described must take the following one-time only reports: Notification of the date of construction or reconstruction; notification of the anticipated and actual dates of startup, notification of any physical or operational change to an existing facility which may increase the regulated pollutant emission rate; notification of the date of the initial performance test; and the results of the initial performance test.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports

and records and semi-annual reports in general, of all sources subject to NSPS.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on April 18, 2000; no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 25 hours per response. Burden means the total time, effort, or financial resources expended by person to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information, adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources, complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners/Operators of Nitric Acid Plants.

Estimated Number of Respondents: 35.

Frequency of Response: semi-annual.

Estimated Total Annual Hour Burden: 1,796.

Estimated Total Annualized Capital and O&M Cost Burden: \$3,568.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1056.07 and OMB Control No. 2060-0019 in any correspondence.

Dated: October 25, 2000.

Agency Information Collection Activities: Submission for OMB Review; Comment Request; National Emission Standards for Hazardous Air Pollutants (NESHAP) for Commercial Ethylene Oxide Sterilization and Fumigation Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Reporting and Recordkeeping Requirements for the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Commercial Ethylene Oxide Sterilization and Fumigation Operations, OMB Control Number 2060-0283, expiration date December 31, 2000. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before December 4, 2000.

ADDRESSES: Send comments, referencing EPA ICR 1666.05 and OMB Control Number 2060-0283 to Sandy Farmer at EPA, U.S. Environmental Protection Agency, Collection Strategies Division (Mail Code 2822) 1200 Pennsylvania Avenue, N.W. Washington D.C. 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, N.W. Washington D.C. 20503.

FOR FURTHER INFORMATION CONTACT: For a copy of the ICR contact Sandy Farmer at EPA by phone at (202) 260-2740, by E-mail at farmer.sandy@epa.gov, or download off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1666.05. For technical questions about the ICR contact Jonathan Binder at EPA by phone at (202) 564-2516, by E-mail at binder.jonathan@epa.gov.

SUPPLEMENTARY INFORMATION:

Title: National Emission Standards for Hazardous Air Pollutants (NESHAP) for Commercial Ethylene Oxide Sterilization and Fumigation Operations (OMB Control No. 2060-0283; EPA ICR No. 1666.05) expiring 12/31/00. This is

a revision of a currently approved collection.

Abstract: The Agency is required under section 112(d) of the Clean Air Act, as amended, to regulate emissions of hazardous air pollutants listed in section 112(b).

Certain records and reports are necessary to enable the Administrator to: (1) Identify new, modified, reconstructed, and existing sources subject to the standards and (2) ensure that the standards, which are based on maximum achievable control technology (MACT) and generally available control technology (GACT), are being achieved. These records and reports are required under the General Provisions of 40 CFR part 63, subpart A (as authorized under sections 101, 112, 114, 116, and 301 of the Clean Air Act as amended by Public Law 101-549 (U.S.C. 7401, 7412, 7414, 7416, 7601)).

These standards apply to new and existing commercial Ethylene Oxide (EO) sterilization and fumigation facilities that use air pollution control devices that are in operation after promulgation of the NESHAP. There are an estimated total of 100 commercial EO sterilization and fumigation operations affected by the NESHAP nationwide. The number of new operations is expected to be low because limited net growth is predicted for this industry.

Owners or operators of the affected facilities described must submit one-time reports of start of construction, anticipated or actual startup dates, and physical or operation changes to existing facilities. In addition, owners or operators of existing or new commercial EO sterilization and fumigation operations will submit one-time reports of actual or estimated annual EO use.

Reports of initial emissions testing are necessary to determine that the applicable emission limit is being met. The owner or operator of a commercial EO sterilization and fumigation operation that uses an air pollution control device to meet the emission limit is required to maintain records of the site-specific monitoring parameters as well as daily and monthly inspections of the control device.

The emissions test reports and other records must be kept at the facility for a minimum of five years and be made available to the Administrator upon request. All reports and records must comply with the General Provisions to 40 CFR part 63. Owners or operators of a source subject to these standards will provide a semi-annual report of excess emissions that includes the monitored operating parameter value readings required by the standards. The respondent's state or local agency can be
