

considered three alternatives to the proposed Project: (1) No permits issued (the "No Project" alternative), (2) revising the project by decreasing the size of the developable area, and (3) revising the project by increasing the size of the conservation area.

Under the "No Project" alternative the permits would not be issued to each individual landowner. The landowners would be independently responsible for their respective projects and would pursue local approvals and individual incidental take permits where necessary. It is likely that some of the projects would receive local approvals to proceed and some of the projects would be denied approvals by their local jurisdictions until they either conducted focused Delhi Sands flower-loving fly surveys to determine presence or absence or received individual incidental take permits. Although this alternative would likely result in no impact by development of some of the Project sites immediately, the Applicants would not collectively secure, enhance, or restore the conservation area for recovery or conservation of the Delhi Sands flower-loving fly currently being proposed under the Proposed Action. If individual project sites are determined to be occupied by the Delhi Sands flower-loving fly, then an incidental take permit will be necessary for those project proponents who wish to proceed with development.

Under the second alternative, some of the parcels would be eliminated from the developable area while maintaining the conservation measures that are part of the Proposed Action. This would result in fewer Delhi soils being developed and the size of the proposed conservation area for the Delhi Sands flower-loving fly would remain the same as under the Proposed Action.

Under the third alternative, there would be a 1-acre (12 acres total) increase in the size of land being conserved while maintaining the same area proposed for development that is part of the Proposed Action. Compared to the Proposed Action, this alternative would result in an additional acre being conserved for the Delhi Sands flower-loving fly.

This notice is provided pursuant to section 10(a) of the Endangered Species Act and Service regulations for implementing the National Environmental Policy Act of 1969 (40 CFR 1506.6). We will evaluate the permit applications, the Habitat Conservation Plan, Environmental Assessment, the associated documents and comments submitted thereon to determine whether the applications

meet the requirements of section 10(a) of the Endangered Species Act. If we determine that the requirements are met, we will issue permits for the incidental take of the Delhi Sands flower-loving fly to the Applicants. We will make a final decision on these permit actions no sooner than 60 days from the date of this notice.

Dated: October 26, 2000.
