II. Background

A. Purpose of the Meeting

This 3-day meeting concerns several scientific issues undergoing consideration within the EPA Office of Prevention, Pesticides and Toxic Substances (OPPTS), as follows.

1. *LifeLine™ Model review.* Review key features of the LifeLine™ Model to include the software code, data requirements, data inputs, and output reports. To assist the Panel in their evaluation of LifeLine™ each Panel member will be provided a CD containing the LifeLine™ software and supporting documentation. The Panel will be evaluating hypothetical, yet representative, residue and toxicological data sets for assessing aggregate and cumulative exposure and risk via the dietary, residential and drinking water pathways.

2. *A Case Study of the Cumulative Risk of 24 Organophosphate Pesticides.* The case study will illustrate data use and the process for integrating multi-pathway exposures to 24 organophosphate pesticides from food, drinking water and residential sources. This topic will be divided in 4 sessions: (1) Cumulative risk assessment method for dietary (food) exposure, (2) Cumulative risk assessment for residential exposure, (3) Cumulative risk assessment for drinking water, and (4) Integrated cumulative risk assessment. The first three sessions will illustrate how the Agency applied the principles described in the exposure sections of the cumulative risk assessment guidance to monitoring data for residues of organophosphates on food and water. This approach uses available surrogate data on residential/institutional uses to estimate cumulative exposures/risk using the Relative Potency Factor Method as reviewed by the FIFRA SAP in September, 2000. The background material will describe the assumptions, procedures, and methods employed in the assessment to estimate the cumulative exposures resulting from each of the three pathways. An illustration of an approach to integrate

exposures from the three pathways into a complete cumulative assessment will be described in session 4.

B. Panel Report

Copies of the Panel's report of their recommendations will be available approximately 45 working days after the meeting, and will be posted on the FIFRA SAP web site or may be obtained by contacting PIRIB at the address and telephone listed below under Unit I.B. of this document.
