NUCLEAR REGULATORY COMMISSION

Public Workshop on Risk-Informed Regulation Implementation Plan (Reactor Safety Arena)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of workshop.

SUMMARY: The Nuclear Regulatory Commission (NRC) will host a public workshop to provide an opportunity for a discussion of the NRC's Risk-Informed Regulation Implementation Plan (RIRIP). The NRC issued a notice of availability and request for public comment on the RIRIP in the **Federal Register** on December 21, 2000. This workshop will focus on activities associated with regulating nuclear reactors.

DATES: The workshop will be held on Thursday, March 15, 2001 from 1:30 p.m. to 4:30 p.m.

ADDRESSES: Capital Hilton Hotel, 16th and K Streets, NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Stewart Magruder, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 415-3139, email: slm1@nrc.gov.

SUPPLEMENTARY INFORMATION: The NRC's 1995 policy statement on the use of probabilistic risk assessment provided the Commission's expectation on the use of risk information in its regulatory activities. The RIRIP provides guidance

and describes the staff's plans for applying criteria to select regulatory requirements and practices to risk-inform, risk-informing those requirements and practices, and developing the necessary data, methods, guidance, and training. The RIRIP is also intended to explain the agency's activities, philosophy, and approach to risk-informed regulatory policy to internal and external stakeholders. The RIRIP is available on the NRC web site at <http://www.nrc.gov/RES/riskinfreg.htm>.

The purpose of this workshop is to discuss comments received in response to the December 21, 2000, notice in the **Federal Register** and to provide for an exchange of information with all stakeholders regarding the staff's efforts to risk-inform its regulatory requirements and practices. Although comments are welcome on the entire RIRIP, this workshop will focus on the implementation activities in the reactor safety arena portion of the RIRIP (Part 2, Chapter 1.)

As noted in the December 21, 2000, feedback is especially requested on the following specific questions—

1. Does the RIRIP include information activities that should not be undertaken? If so, why not?

2. Does the RIRIP omit implementation activities that should be undertaken? Describe such activities and why they should be undertaken.

3. How should the NRC measure its success in implementing risk-informed regulation?

4. Is the pace for implementing risk-informed regulation about right, or is it too fast or too slow?

5. Are there concerns about the agency's ability to maintain safety while implementing risk-informed regulation? If so, describe the concerns and, if possible, their basis.

6. How can risk-informed regulation increase public confidence?

7. Are the screening criteria clear and sufficient? If applied properly, would they result in identifying those activities amenable for transition to risk-informed regulation?

8. Will the implementation activities described in the RIRIP appropriately improve regulatory efficiency, effectiveness, and realism?

9. Other than requests such as this for written comment and a public workshop, how can stakeholder participation in risk-informed regulation be enhanced?

10. What communication activities would be desired to describe risk-informed regulation? What other interactions would be useful to provide

input to, and understanding of, risk-informed regulation?

CMS Energy Corporation (70–9843)

CMS Energy Corporation (“CMS Energy”), Fairlane Plaza South, 330 Town Center Drive, Suite 1100, Dearborn, Michigan 48126, a Michigan public-utility holding company claiming exemption under section

3(a)(1) of the Act by rule 2, has filed an application under sections 9(a)(2) and 10 of the Act.

CMS Energy proposed to acquire indirectly, through Consumers Energy Company (“Consumers Energy”), its public utility subsidiary, all of the voting securities of Michigan Electric Transmission Company (“Michigan Transco”), a currently inactive Michigan corporation. In exchange for these voting securities, Consumers Energy intends to transfer its ownership interest in certain transmission facilities (“Transmission Assets”) to Michigan Transco (“Transfer”). The Transmission Assets, which will be transferred at their actual depreciated value, consist of: transmission lines (including towers, poles, and conductors); transformers with voltage ratings of 120kV and above; generation tie lines from the transmission grid to the point of connection to the generator step-up transformers; associated voltage control devices and power flow control devices; associated transmission substations; and spare transmission equipment. Upon acquiring the Transmission Assets, Michigan Transco will become a public-utility company within the meaning of the Act.

CMS Energy states that the Transfer is designed to allow Consumers Energy, in the future, either to sell its transmission system to an unaffiliated third-party or transfer control of it to a regional transmission organization. It is stated that the formation of Michigan Transco is expected to create synergies that result in better regional transmission service. Consumers Energy states that it intends to continue to provide electric generation and distribution services to retail customers.

After the Transfer, Consumers Energy will claim, and CMS Energy will continue to claim, exemption from registration by rule 2, under sections 3(a)(2) and 3(a)(1) of the Act, respectively.
