

Estimated Total Annual Respondent Cost Burden: Of the 1,224 estimated annual responses for Form PTO/SB/32, the USPTO expects to receive 275 responses from small entities (§ 1.9(f)) and 949 responses from others. Under 37 CFR 1.17(d), the processing fee for filing a request for an oral hearing before the Board of Patent Appeals and Interferences is \$135 for small entities

and \$270 for others. Therefore, the total annual nonhour cost burden associated with this form is \$293,355.

When filing a request for deferral of examination, the applicant must pay the processing fee of \$130 indicated by 37 CFR 1.17(i) and the publication fee of \$300 indicated by 37 CFR 1.18(d). The combined filing cost of \$430 for each request results in a total annual nonhour

cost burden of \$21,500 associated with this form.

Using the professional hourly rate of \$175 per hour for associate attorneys in private firms, the USPTO estimates \$42,840 per year for salary costs associated with respondents using Form PTO/SB/32, and \$1,750 per year for salary costs associated with respondents using Form PTO/SB/37.

Title: Evaluation of the Effectiveness of Learn and Serve America Grants in Promoting Institutionalization of Service-Learning in Grantee Institutions.

OMB Number: None.

Agency Number: None.

Affected Public: Service-learning coordinators, service-learning program administrators or similar staff at schools, school districts, community-based organizations or higher education institutions that received a Learn and Serve America grant in 1994-95.

Total Respondents: Approximately 470 service-learning coordinators or similar staff in schools, districts, community-based organizations and higher education institutions that received Learn and Serve grants.

Frequency: This is a one-time survey.

Average Time Per Response: 60 minutes.

Estimated Total Burden Hours: 470 hours.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): None.

Description: The Corporation seeks approval of a survey to be used in evaluating the effectiveness of Learn and Serve America grants in promoting the institutionalization of service-learning in grantee institutions and the degree to which funded programs have been and are likely to be sustained after the completion of the grant period.

There are four versions of the survey: one each for K-12 district and school-based programs, one for community-based organizations, and one for higher education institutions. The versions are parallel in structure and content, with variations in the wording of specific items to address the characteristics of

each type of institution. The surveys will be administered to a sample of 470 Learn and Serve grantee and subgrantee organizations that received their initial Learn and Serve grants in 1994–95.

The study will allow the Corporation to assess the growth and institutionalization of service-learning in Learn and Serve grantee institutions, to assess the degree to which service-learning activities have been sustained after the end of Learn and Serve funding, and to assess the role of Learn and Serve America grants in promoting the growth and institutionalization of service-learning in grantee institutions. Findings from the study will help the Corporation to develop more effective strategies for supporting institutionalization of service-learning through its planning, grantmaking and technical assistance activities.

There have been two changes since the publication of the 60 day notice (**Federal Register**, November 16, 2000 (Volume 65, Number 222), Pages 69288–69290). The original plan called for the survey to be administered through a telephone interview. The current plan calls for the survey to be distributed as a paper-based, mail survey. The original plan also included short and long versions of each form. The current submission includes a single version of each form.

Dated: February 21, 2001.

Lance D. Potter,

Director, Office of Evaluation.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)).

On February 12, 2001, the Office of Fossil Energy (FE) of the Department of Energy (DOE) received an application from IPC to transmit electric energy from the United States to Mexico. IPC is a wholly owned subsidiary of IDACORP, Inc. IPC is incorporated under the laws of the State of Idaho and is authorized to operate in Idaho, Oregon, and Nevada. The electric energy IPC proposes to export to Mexico would be purchased from electric utilities, Federal power marketing agencies, cogeneration facilities, and exempt wholesale generators within the United States. In addition, IPC proposes to export electric energy from power plants that it owns only if that energy is surplus to the needs of its native-load customers.

IPC proposes to arrange for the delivery of electric energy to Mexico over the international transmission facilities owned by San Diego Gas & Electric Company, El Paso Electric Company, Central Power and Light Company, and Comision Federal de Electricidad, the national electric utility of Mexico. The construction of each of the international transmission facilities to be utilized by IPC, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to the National Environmental Policy Act of 1969 (NEPA), and a determination is made by the DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.
