SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0031.

Title: Application for Consent to Assignment of Broadcast Station Construction Permit or License.

Form No.: FCC 314.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions.

Number of Respondents: 1,591.

Estimated Time Per Response: 12-48 hours (the burden hour time and contracting time varies depending on the type of application filed).

Frequency of Response: On occasion reporting requirement, third party disclosure requirement.

Total Annual Burden: 2,546 hours.

Total Annual Cost: \$12,237,878.

Needs and Uses: FCC Form 314 and applicable exhibits/explanations are required to be filed when applying for consent for assignment of an AM, FM or TV broadcast station construction permit or license, along with applicable exhibits and explanations. In addition, the applicant must notify the Commission when an approved assignment of a broadcast station construction permit or license has been consummated.

This collection also includes the third party disclosure requirement of Section 73.3580. This section requires local public notice in a newspaper of general circulation of the filing of all applications for assignment of license/permit. This notice must be completed within 30 days of the tendering of the application. This notice must be published at least twice a week for two consecutive weeks in a three-week period. A copy of this notice must be placed in the public inspection file along with the application.

Additionally, an applicant for assignment of license must broadcast the same notice over the station at least once daily on four days in the second

week immediately following the tendering for filing of the application.

On April 4, 2000, the Commission adopted a Report and Order in MM Docket No. 95-31 in the Matter of Reexamination of the Comparative Standards for Noncommercial Educational Applicants. This Report and Order adopted new procedures to select among competing applicants for noncommercial educational (NCE) broadcast channels. The new procedures will use points to compare objective characteristics whenever there are competing applications for full-service radio or television channels reserved for NCE use. The new procedure established a four-year holding period of on-air operations for licenses approved as a result of evaluation in a point system. The FCC 314 has been revised to reflect the new policy and to require stations authorized under the point system who have not operated for a four-year period to submit with their applications an exhibit demonstrating compliance with Section 73.7005.

The data is used by the FCC staff to determine whether the applicants meet basic statutory requirements to become a Commission licensee/permittee and to assure that the public interest would be served by grant of the application.
