

have been collected annually in the CPS for 30 years.

This survey provides information on public/private elementary school, secondary school, and college enrollment, and on characteristics of private school students and their families, which is used for tracking historical trends, policy planning, and support. This year's supplement contains additional questions which were last asked in 1988 and 1992 on adult and vocational education. The questions are asked of adults (age 15 and over) and focus on characteristics of vocational courses and types of adult education being pursued. This survey is the only source of national data on the age distribution and family characteristics of college students and the only source of demographic data on preprimary school enrollment. As part of the federal government's efforts to collect data and provide timely information to local governments for policymaking decisions, the survey provides national trends in enrollment and progress in school.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to conduct the 2002 New York City Housing and Vacancy Survey (NYCHVS) under contract for the City of New York. The primary purpose of the survey is to measure the rental vacancy rate which

is the primary factor in determining the continuation of rent control regulations. Other survey information is used by city and state agencies for planning purposes as well as the private sector for business decisions. New York is required by law to have such a survey conducted every three years.

Information to be collected includes: age, gender, race, hispanic origin, and relationship of all household members; employment status, education level, and income for persons aged 15 and above. Owner/renter status (tenure) is asked for all units, including vacants. Utility costs, monthly rent, availability of kitchen and bathroom facilities, maintenance deficiencies, neighborhood suitability, and other specific questions about each unit such as number of rooms and bedrooms are also asked. The survey also poses a number of questions relating to handicapped accessibility. For vacant units, a shorter series of similar questions is asked. Finally, all vacant units and approximately five percent of occupied units will be reinterviewed for quality assurance purposes.

II. Method of Collection

All information will be collected by personal interview.
