

or amount of benefits, or verifying other information which respect thereto.

D. Records To Be Matched

The systems of records maintained by the respective agencies under the Privacy Act of 1974, as amended, 5 U.S.C. 552a, from which records will be disclosed for the purpose of this computer match are as follows:

The VA will use the system of records identified as 'VA Compensation, Pension and Education and Rehabilitation Records—VA (58 VA 21/22)' first published at 41 FR 924 (March 3, 1976), and last amended at 60 FR 20156, April 24, 1995, with other amendments as cited therein.

DoD will use the system of records identified as S322.10 DMDC, entitled 'Defense Manpower Data Center Data Base,' published at 66 FR 43302, July 13, 2000.

E. Description of Computer Matching Program

The VA, as the source agency, will provide DMDC with an electronic file which contains specified data elements of individual VA disability compensation recipients. Upon receipt of the electronic file, DMDC will perform a computer match using all nine digits of the SSNs in the VA file against a DMDC computer database. The DMDC database consists of personnel records of active duty (including full-time National Guard and Reserve) military members. Matching records, 'hits' based on the SSN, will produce the member's name, branch of service, unit designation, and other pertinent data elements. The hits will be furnished to the Veterans Benefits Administration which is responsible for verifying and determining that the data on the DMDC electronic file are consistent with the source file and for resolving any discrepancies or inconsistencies on an individual basis. The Veterans Benefits Administration will also be responsible for making final determinations as to eligibility for benefits or verifying any other information with respect thereto.

The electronic file provided by VA will contain information on approximately 2.2 million disability compensation recipients.

The DMDC computer database file contains approximately 1.4 million records of active duty military members, including full-time National Guard and Reserve.

DMDC will match the SSN on the VA electronic file by computer against the DMDC database. Matching records, hits based on SSNs, will produce data elements of the member's name, SSN,

date of birth, branch of service, unit designation, unit address, and date of entry (DOE) on active duty.

F. Inclusive Dates of the Matching Program

This computer matching program is subject to public comment and review by Congress and the Office of Management and Budget. If the mandatory 30 day period for comment has expired and no comments are received and if no objections are raised by either Congress or the Office of Management and Budget within 40 days of the date of the transmittal letter, the computer matching program becomes effective and the respective agencies may begin the exchange at a mutually agreeable time on a quarterly basis. By agreement between VA and DMDC, the matching program will be in effect for 18 months with an option to renew for 12 additional months unless one of the parties to the agreement advises the other by written request to terminate or modify the agreement.

G. Address for Receipt of Public Comments or Inquiries:

Director, Defense Privacy Office, 1941 Jefferson Davis Highway, Suite 920, Arlington, VA 22202-4502. Telephone (703) 607-2943.
