

engineering and cost analyses because the results showed that the two blowing agent alternatives can be used to achieve similar performance for similar costs to HFC-245fa. DOE estimates are reasonable and address the concern of the Department of Justice to provide more than one choice of insulation blowing agent with comparable performance and at approximately the same cost.

Based on the analysis of the three different types of blowing agents, HFC-245fa-, pentane/cyclopentane- and HFC-134a, DOE concluded that water heater manufacturers will have several choices to reach the standard, including blends of these blowing agents, and therefore, will not have to rely on a sole source supplier.

V. Conclusion

After careful consideration of the GAMA and AGA petitions for reconsideration before the Secretary of Energy, a review of the letter from the coalition of energy advocacy organizations, and a detailed review of the record that supports this final rule, DOE hereby denies the petitions for reconsideration and concludes that no further action is warranted.

Issued in Washington, D.C. on April 12, 2001.

Spencer Abraham,

Secretary of Energy.

BILLING CODE 6450-01-P

FEDERAL RESERVE SYSTEM

12 CFR Part 261a

[Docket No. R-1102]

Rules Regarding Access to Personal Information Under the Privacy Act

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: In accordance with the Privacy Act, the Board of Governors of the Federal Reserve System (Board) is amending its Rules Regarding Access to Personal Information under the Privacy Act. Notice of this new system of records, entitled Protective Information System (BGFRS-31) is published in an adjacent notice. This rule also makes a technical correction to an earlier document.

EFFECTIVE DATE: May 21, 2001.

FOR FURTHER INFORMATION CONTACT: Elaine M. Boutilier, Managing Senior Counsel, Legal Division (202/452-2418), Board of Governors of the Federal Reserve System, 20th and Constitution, NW., Washington, DC 20551.

SUPPLEMENTARY INFORMATION: The Board's Protective Services Unit (PSU) was established to provide security for the Chairman and other members of the Board of Governors. To facilitate security procedures, the PSU intends to implement a software program that was developed for law enforcement entities to monitor activities of individuals under investigation. The PSU plans to use this system to monitor the correspondence and/or activities of individuals that are perceived to present a possible threat to the safety of Board members. Inclusion of individuals in this system will result primarily from correspondence received from such individuals that is perceived to be threatening to members of the Board. Information may also be received from law enforcement agencies that have information regarding a potential threat to members of the Board. The software that is being acquired for this system will allow the PSU to sort files by a variety of subjects, including such things as names, aliases, addresses, zip codes, etc. This will permit the PSU to obtain a better understanding of the threat, if any, that is presented by an individual or group of individuals. Because this information consists of investigatory material that is compiled for the law enforcement purpose of protecting members of the federal government, it is exempt from certain provisions of the Privacy Act, including

the access provisions, pursuant to section (k)(2), 5 U.S.C. 552a(k)(2).

The Board's Rules Regarding Access to Personal Information under the Privacy Act must be amended to include this system of records in the list of "exempt" systems of records. In addition, the Board is taking this opportunity to make a technical correction by moving the citation to the Multi-Rater Feedback Records from the list of systems in § 261a.13(b) that are exempted pursuant to (k)(2), to the list of systems in § 261a.13(c) that are exempted pursuant to (k)(5). The Multi-Rater Feedback Records had been incorrectly placed in the (k)(2) list by the Board's notice on May 30, 2000 (65 FR 34471).

Regulatory Flexibility Act

In accordance with 5 U.S.C. 605, the Board certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Administrative Procedure Act

This rule is exempt from the rule making provisions of the Administrative Procedure Act, 5 U.S.C. 553, and the Congressional Review Act, pursuant to 5 U.S.C. 804(3)(B) and (C), because it is a rule relating to agency management or personnel and a rule of agency procedure that does not substantially affect the rights or obligations of non-agency parties.

List of Subjects in 12 CFR part 261a

Federal Reserve System, Privacy.

For the reasons set forth in the preamble, the Board amends 12 CFR part 261a as follows:

PART 261a—RULES REGARDING ACCESS TO PERSONAL INFORMATION UNDER THE PRIVACY ACT OF 1974

1. The authority citation for part 261a continues to read as follows:

Authority: 5 U.S.C. 552a.

2. In § 261a.13, revise paragraph (b)(9) and add paragraph (e)(11) to read as follows:

§ 261a.13 Exemptions.

(a) * * *
(9) BGFRS-31 Protective Information System.

* * * * *
(c) * * *
(11) BGFRS-25 Multi-rater Feedback Records.

* * * * *

By order of the Board of Governors of the Federal Reserve System, April 11, 2001.

Jennifer J. Johnson,
Secretary of the Board.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001-CE-02-AD; Amendment 39-12178; AD 2001-08-01]

RIN 2120-AA64

Airworthiness Directives; JanAero Devices 14D11 and 23D04 Series Fuel Regulator and Shutoff Valves

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain JanAero Devices (JanAero) fuel regulator and shutoff valves used with JanAero combustion heaters that are installed on airplanes. This AD requires you to visually inspect and pressure test for leaks, and, if leaks are found, replace the fuel regulator and shutoff valve used with JanAero combustion heaters. This AD is the result of numerous reports of fuel regulator and shutoff valves leaking fuel. The actions specified by this AD are intended to prevent fuel leakage in airplanes with these combustion heaters with a consequent hazardous fire.

DATES: This AD becomes effective on May 10, 2001.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulation as of May 10, 2001.

The Federal Aviation Administration (FAA) must receive any comments on this rule by May 31, 2001.

ADDRESSES: Send three copies of comments to FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2001-CE-02-AD, 901 Locust, Room 506, Kansas City, Missouri 64106.

You may get the service information referenced in this AD from JanAero Devices, P.O. Box 273, Fort Deposit, Alabama 36032; telephone: (334) 227-8306; facsimile: (334) 227-8596. You may read this information at FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 2001-CE-02-AD, 901 Locust, Room 506, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Linda M. Haynes, Aerospace Engineer, FAA, Atlanta Aircraft Certification Office, One Crown Center, 1895 Phoenix Boulevard, suite 450, Atlanta, Georgia 30349; telephone: (770) 703-6091; facsimile: (770) 703-6097.

SUPPLEMENTARY INFORMATION:

Discussion

What Events Have Caused This AD

The FAA has received reports of numerous occurrences of JanAero fuel regulator and shutoff valves leaking. These fuel leakages were observed during routine inspections of the airplanes. The manufacturer has determined that the fuel leakages can occur in valves manufactured before November 2000. These leakages are caused by a quality control problem with the manufacture of these JanAero valves.

The affected fuel regulator and shutoff valves are part of the JanAero B1500, B2030, B2500, B3040, B3500, B4050, or B4500 combustion heater configuration.

What Are the Consequences If the Condition Is Not Corrected

This condition, if not corrected, could result in fuel leakage with a consequent hazardous fire.

Is There Service Information That Applies to This Subject

JanAero has issued Service Bulletin No. A-107, dated January 8, 2001. This service bulletin includes procedures for:

- Visually inspecting the fuel regulator and shutoff valve for fuel leakage;
- Doing a pressure test for fuel leakage on the fuel regulator and shutoff valve; and
- Replacing the fuel regulator and shutoff valve, if fuel leakage is found.

The FAA's Determination and an Explanation of the Provisions of This AD

What Has FAA Decided

The FAA has reviewed all available information, including the service information referenced above; and determined that:

- The unsafe condition referenced in this document exists or could develop on airplanes equipped with either a JanAero B1500, B2030, B2500, B3040, B3500, B4050, or B4500 combustion heater;
- Any airplane with one of these combustion heater units should have the actions specified in the above service bulletin incorporated; and
- The FAA should take AD action to correct this unsafe condition.

What Does This AD Require

This AD requires you to accomplish the actions previously specified following JanAero Devices Service Bulletin No. A-107, dated January 8, 2001.
