##### Background

The FHWA, in cooperation with the Iowa Department of Transportation, will prepare an environment impact statement (EIS) for a capacity improvement study for U.S. 20 between the Peosta Interchange and Devon Drive in the City of Dubuque in Dubuque County, Iowa.

The capacity improvement study is to consider reconstruction of U.S. 20 to provide a free flow facility. The U.S. 20 Capacity Improvement Study will identify and evaluate potential long-range improvements for the U.S. 20 corridor. Improvements that will be considered include the addition of interchanges, modifications to adjacent existing intersections and frontage roads, and conversion of two-way frontage roads to one-way. The two main goals of the study are to (1) identify feasible concepts to provide free flow traffic on U.S. 20 and (2) to determine a preferred concept.

Letters describing the proposed action and soliciting comments have been sent to appropriate federal, state, and local agencies, and to private organizations
