National Toxicology Program (NTP); National Institute of Environmental Health Sciences; Center for the Evaluation of Risks to Human Reproduction (CERHR) Solicits Public Comments on Draft Guidelines for CERHR Expert Panel Members

Background

The NTP and the National Institute of Environmental Health Sciences established the NTP Center for the Evaluation of Risks to Human Reproduction (CERHR) in 1998 to serve as an environmental health resource to the public and regulatory and health agencies. The CERHR provides scientifically based, uniform assessments of the potential for adverse effects on reproduction and development caused by agents to which humans may be exposed. The assessments are carried out through rigorous, independent evaluations of the scientific literature on these agents by panels of scientists. The products of these evaluations are Expert Panel Reports.

The Expert Panel Report provides a consensus scientific judgement of the potential human reproductive and developmental toxicity of the chemical agent or mixture. The goals of the evaluations are to:

(1) Evaluate the quality of the available scientific data and identify critical data needs so that research and testing priorities can be established;

(2) Interpret scientific studies for and provide information to the general public about the strength of evidence that a given exposure poses a hazard to reproduction and/or to the health and welfare of the developing child; and

(3) Provide regulatory agencies with objective and scientifically credible evaluations of reproductive/developmental health effects associated with exposure to specific chemicals or classes of chemicals, including descriptions of any uncertainties associated with the assessment of risks.

Availability of Draft Guidelines for CERHR Expert Panel Members

In order to maintain consistency among the expert panel reviews and to provide guidance about these reviews and preparation of Expert Panel Reports, the CERHR has prepared *draft* guidelines for the expert panels and CERHR staff. The Guidelines cover the three phases of the Expert Panel review process: pre-meeting preparation, Expert
