#### SUPPLEMENTARY INFORMATION:

##### I. Background

Under section 103(g) of the Mine Safety and Health Act of 1977 (Pub. L. 91-173, as amended by Pub. L. 95-164) (the Act), a representative of miners, or any individual miner acting voluntarily as a representative of miners, may submit a written notification of alleged violation of the Act or a mandatory standard or of an imminent danger. Such notification requires MSHA to make an immediate inspection. A copy of the notice must be provided to the operator.

Title 30, CFR, part 43, implements section 103(g) of the Act. It provides the procedures for submitting notification of the alleged violation and the actions which MSHA must take after receiving the notice. Although the regulation contains a review procedure (required by section 103(g)(2) of the Act) whereby a miner or a representative of miners may in writing request a review if no citation or order is written as a result of the original notice, the option is so rarely used that it was not considered in the burden estimates.

##### II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Hazardous Conditions Complaints addressed by 30 CFR 43.4 and 43.7. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
