SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau plans to extend the current OMB clearance for the Survey of Plant Capacity Utilization. The survey is conducted annually collecting data for fourth quarter operations. The survey collects, from manufacturing plants, the value of actual production and the value of production that could have been achieved if operating at "full production" and "emergency production" levels. The survey also collects data on work patterns by shift. These data include hours in operation, production workers, and plant hours worked. The resulting estimates are used in measuring inflationary pressures, capital flows, production indexes and analyzing and forecasting economic and industrial trends. The survey results are primarily used by the Federal Reserve Board, Federal Emergency Management Agency, and the Department of Defense.

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect the data. Companies will be asked to respond within 30 days of the initial mailing. This due date will be imprinted at the top of the form. Letters encouraging participation will be mailed to companies that have not responded by the designated time.

SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau is the preeminent collector of timely, relevant and quality data about the people and economy of the United States. Economic data are the Census Bureau's primary program commitment during non-decennial census years. The economic census, conducted under authority of title 13 U.S.C., is the primary source of facts about the structure and function of the Nation's economy and features unique industry and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business and the general public.

The data collection for ownership and control questions is a supplement to the 2002 Economic Census. In prior censuses these questions were included as part of the economic census questionnaires and used to determine if single-establishment firms were either owned or controlled by another company or if they operate at more than one location. Since the ownership or control questions only apply to single-establishment companies, we have removed these questions from economic census questionnaires. We will include these questions on a separate flier that only will be inserted in economic census questionnaire mail out packages for single-establishment firms.

II. Method of Collection

The economic census will select establishments for its mail canvas from the Census Bureau's Business register. For those single-establishments firms selected in the economic census, an ownership or control flier will be inserted in the mail out package. We estimate that for the 2002 Economic Census there will be approximately 2,442,300 establishments of single-establishment firms.

Foreign-Trade Zones Board

[Docket 17-2001]

Foreign-Trade Zone 138—Columbus, OH; Application for Subzone E.I. DuPont de Nemours and Company, Inc. (Chemical Products) Circleville, OH

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Rickenbacker Port Authority, grantee of FTZ 138, requesting special-purpose subzone status for the manufacturing and warehousing facilities of E.I. DuPont de Nemours and Company, Inc. (DuPont), located in Circleville, Ohio. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on April 23, 2001.

DuPont has two sites with 320 employees in Pickaway County, Ohio. Site 1 (750 acres) is located at U.S. Route 23 and DuPont Road, Circleville, Ohio. Site 2 (193,000 square feet) is located at 2300 Owens Road, Circleville, Ohio. The DuPont facility is used for the manufacturing, testing, packaging and warehousing of Kapton® polyimide films (HTS 3920.99.22, duty rate 4.2%), which are used in miniaturized electronic components, microprocessor chip carriers and high speed locomotive motors. Components and materials

sourced from abroad (representing about 73% of all parts consumed in manufacturing) include: 4-4'-oxydianiline (ODA); 3,4,3',4' biphenyl tetracarboxylic dianhydride (BPDA); pyromellitic dianhydride (PMDA); benemine, 4,4'-(1,3-phenylenebis (oxy)) bis (RODA); and 4,4'-oxydiphthalic anhydride (ODPA) (HTS 2922.29.80, 2917.39.30, 2917.39.70, 2922.29.29, and 2917.39.30, duty rate ranges from 6.5% to 10.6%).

FTZ procedures would exempt DuPont from Customs duty payments on the foreign components used in export production. Some 35 percent of the plant's shipments are exported. On its domestic sales, DuPont would be able to choose the duty rates during Customs entry procedures that apply to finished polyimide film (4.2%) for the foreign inputs noted above. The request indicates that the savings from FTZ procedures would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ staff has been appointed examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is July 2, 2001. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to July 16, 2001).

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, Export Assistance Center, Two Nationwide Plaza, Suite 1400, Columbus, OH 43215.

Office of the Executive Secretary, Foreign-Trade Zones Board, Room 4008, U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., Washington, DC 20230.
