Time Limits

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within these time periods, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the preliminary determination to a maximum of 365 days and for the final determination to 180 days (or 300 days if the Department does not extend the time limit for the preliminary determination) from the date of publication of the preliminary determination.

Background

On January 26, 2000, the Department published a notice of initiation of administrative review of the

antidumping duty order on certain cased pencils from the People's Republic of China, covering the period December 1, 1998 through November 30, 1999 (65 FR 4228). On January 9, 2001, we published the preliminary results of review (66 FR 1638). In our notice of preliminary results, we stated our intention to issue the final results of this review no later than May 9, 2001.

Extension of Time Limit for Final Results of Review

We determine that it is not practicable to complete the final results of this review within the original time limit. Therefore the Department is extending the time limit for completion of the final results until no later than July 8, 2001. See Decision Memorandum from Howard B. Smith to Thomas F. Futtner, dated concurrently with this notice, which is on file in the Central Records Unit, Room B-099 of the main Commerce building.

Sometimes these will be components of cells such as organelles or filaments; sometimes large molecules within cells. In addition, the structure of molecules will be studied at very high resolution by extracting and preparing them so that many copies of the molecule can be imaged at once and these images averaged. The goal of these investigations is to achieve a detailed understanding of the 3-dimensional structure of some cellular component, which in turn can be used to increase the understanding of the component.

Application accepted by Commissioner of Customs: April 13, 2001.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Fishery Management Plans for Atlantic Surf Clams and Ocean Quahogs, and Atlantic Mackerel, Squid, and Butterfish include requirements that the National Marine Fisheries Service and/or the Mid-Atlantic Fishery Management Council survey domestic processors and joint venture operators annually to establish industry capacity to utilize the managed species.

A survey, described in the squid, mackerel and butterfish regulations at 50 CFR 648.21(b), is used to establish the intent and capacity of the U.S.

industry to utilize allowable harvest in a given year. If the U.S. industry is unable to fully utilize the allowed harvest of Atlantic mackerel, the excess may be used in establishing levels of catch for joint ventures and/or direct foreign harvest.

A survey, required under the surf clam and ocean quahog regulations at 50 CFR 648.7(a)(3)(ii), is used to obtain data for use in monitoring present processing activities and estimating future production at the processing plant level.

Both annual surveys seek information concerning the annual capacity to process these species; the historical amount of product processed; and the quantity of product to be processed in the future.

II. Method of Collection

Telephone surveys are used for the surf clam/ocean quahog fishery, and paper forms are used for the Atlantic mackerel, squid, and butterfish fisheries.
