

Exchange Commission ("SEC" or "Commission") pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² a proposed rule change to expand the maximum share size parameter for single orders entered into the SuperDot System ("SuperDot System" or "SuperDot") to 3,000,000 shares. On March 30, 2001, the Exchange filed Amendment No. 1.³ The proposed rule change, as amended was published for public comment in the *Federal Register* on April 23, 2001.⁴ No comments were received on the proposed rule change. This order approves the proposed rule change as amended.

I. Description of Proposal

The Exchange's SuperDot System provides automated order routing and reporting services to facilitate the transmission, execution, and reporting of market and limit orders on the Exchange. Pursuant to paragraph (a) of NYSE Rule 123B, "Exchange Automated Order Routing Systems," members and member organizations may utilize the SuperDot System to transmit orders of such size as the Exchange may specify from time to time.

In January 2001, the NYSE increased the maximum SuperDot share size parameters for single market and limit orders entered into the SuperDot System from 30,099 shares (for single market orders) and 99,999 shares (for single limit orders) to 500,000 shares initially, to be followed by an increase six months later to 1,000,000 shares.⁵

The Exchange now proposes to increase the maximum order size for both market and limit orders entered into the SuperDot System to 3,000,000 shares. The increase will become effective six months after the increase to 1,000,000 shares.

The Exchange believes that the proposal will facilitate openings and

closings by increasing the number of shares SuperDot can accommodate; eliminate the need for firms and institutions to break up large orders to make them SuperDot eligible; streamline the cancel and replace process; and help to facilitate the electronic capture of orders as required by NYSE Rule 123, "Record of Orders."⁶

II. Discussion

The Commission finds that the proposal is consistent with the provisions of Section 6(b)(5) of the Act,⁷ which require, among other things, that the rules of the exchange be designed to promote just and equitable principles of trade, to removed impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.⁸ As noted above, the NYSE's SuperDot System provides automated order routing and reporting services to facilitate the transmission, execution, and reporting of market and limit orders on the NYSE. The Commission believes that the proposal to increase the maximum order size for market and limit orders entered into SuperDot to 3,000,000 shares should help to enhance the efficiency of order delivery, execution, and reporting on the NYSE. The Commission believes that the increased efficiency in order delivery, execution, and reporting should facilitate transactions in securities and help the NYSE to maintain a fair and orderly market.

III. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,⁹ that the proposed rule change (SR-NYSE-2001-05), as amended, is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.¹⁰

Deputy Secretary.
