

parts, including wiring and wire installation hardware, requires a drawing package that clearly and completely identifies:

- Shape,
- Material,
- Production processes,
- Any other properties affecting strength or functionality of each part, and
- The arrangement of each part in the final assembly.

As an example, the FAA expects drawings to identify the material specification, heat treat, corrosion protection or other finish, and any other important characteristic of each part subject to test or analysis for showing compliance with the airworthiness requirements. Much of this information can be provided by reference on the drawings to material or process specifications; the references then become part of the drawing and, consequently, part of the type design data package.

Modifiers of aeronautical products should use practices that reflect the certification criteria applicable to the original airplane manufacturer (OAM). The applicant should demonstrate that installation specifications and routing practices for the wiring used by modifiers is either the same as, or compatible with, those that are used presently for showing compliance to the type design certification requirements. Specifically, wire separation, wire types, wire bundle sizes, brackets, and clamping should be consistent with the approved standards. This may require the applicant and/or modifier to:

- Obtain or determine the applicable OAM design standards and/or practices for a given installation,
- Do a physical inspection of the airplanes to be modified to ensure compatibility, and
- Develop processes and procedures to address compatibility between the original installation and the modification.

Modifiers and installers should use the airplane manufacturer's maintenance manuals, such as Maintenance Manual Chapter 20 ("Standard Practices Airframe"), Maintenance Manual Chapter 70 ("Standard Practices Engines"), or Chapter 20 ("Standard Practices Wiring") as the primary source of wiring installation information.

Instructions for Continued Airworthiness: Paragraph 21.50(b) of the regulations requires that Instructions for Continued Airworthiness (ICA) be supplied by the modifier for modifications to aircraft and related products. The ICA for any specific wiring maintenance should be

addressed where § 25.1529 is included in the certification basis.

Assessment of wire condition relies heavily on visual inspection. Consequently, the ICA should address inspectability of wire in conduits and difficult to inspect areas of the airplane. Where wire cannot be inspected visually, the ICA should address wire removal for inspection, when necessary, and the use of inspection techniques that do not rely on visual inspection alone. For example, wire in metal conduits may require repeated inspections for wear.

The FAA expects applicants for modifications to provide airworthiness instructions for the proposed changes in a format compatible with other maintenance instructions for the aircraft involved.

Effect of This Statement of Policy

The general policy stated in this document is not intended to establish a binding norm. It does not constitute a new regulation and the FAA would not apply or rely upon it as a regulation. Those tasked with the responsibility of airplane certification should generally attempt to follow this policy, when appropriate. In determining compliance with certification standards, each certification office has the discretion not to apply these guidelines where it determines that they are inappropriate. However, the certification office should strive to implement this guidance to the fullest extent possible to facilitate standardization and ensure that wiring installation details are adequately addressed during certification. Applicants should expect that the certifying officials will consider this information when making findings of compliance relevant to certification actions. Applicants also may consider the material contained in this policy statement as supplemental to that currently contained in 14 CFR part 21 when developing a means of compliance with the relevant certification standards.

Finally, as with all advisory material, this statement of policy identifies one means, but not the only means, of compliance.

Issued in Renton, Washington, on June 25, 2001.

Vi L. Lipski,

*Manager, Transport Airplane Directorate,
Aircraft Certification Service.*

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

RTCA Special Committee 188: Minimum Aviation System Performance Standards for High Frequency Data Link

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of RTCA Special Committee 188 meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of RTCA Special Committee 188: Minimum Aviation System Performance Standards for High Frequency Data Link.

DATES: The meeting will be held July 10, 2001 starting at 1 pm.

ADDRESSES: The meeting will be held at RTCA, 1140 Connecticut Avenue, NW., Suite 1020, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: RTCA Secretariat, 1140 Connecticut Avenue, NW., Washington, DC, 20036; telephone (202) 833-9339; fax (202) 833-9434; web site <http://www.rtca.org>.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub.L. 92-463, 5 U.S.C. appendix 2), notice is hereby given for a Special Committee 188 meeting. The agenda will include:

July 10, 2001

- Opening Plenary Session (Chairman's Introductory Remarks, Approval of Previous Meeting Summary, Review of Agenda and Work Plan)
- Working Group 1, Review of High Frequency Data Link (HFDL) Minimum Aviation System Performance Standard (MASPS) Status and Draft Report
- Closing Plenary Session (Review Actions Items, Make Assignments, Other Business, Date, Place and Time of Next Meeting, Adjourn)

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on June 21, 2001.

Janice L. Peters,

FAA Special Assistant, RTCA Advisory Committee.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket Number: MARAD-2001-10011]

Requested Administrative Waiver of the Coastwise Trade Laws

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a requested administrative waiver of the Coastwise Trade Laws for the vessel *Balboa Clipper*.

SUMMARY: As authorized by Pub. L. 105-383, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a description of the proposed service, is listed below. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines that in accordance with Pub. L. 105-383 and MARAD's regulations at 46 CFR Part 388 (65 FR 6905; February 11, 2000) that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels, a waiver will not be granted.

DATES: Submit comments on or before August 1, 2001.

ADDRESSES: Comments should refer to docket number MARAD-2001-10011. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. DOT Dockets, Room PL-401, Department of Transportation, 400 7th St., SW., Washington, DC 20590-0001. You may also send comments electronically via the Internet at <http://dmses.dot.gov/submit/>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Kathleen Dunn, U.S. Department of

Transportation, Maritime Administration, MAR-832 Room 7201, 400 Seventh Street, SW., Washington, DC 20590. Telephone 202-366-2307.

SUPPLEMENTARY INFORMATION: Title V of Pub. L. 105-383 provides authority to the Secretary of Transportation to administratively waive the U.S.-build requirements of the Jones Act, and other statutes, for small commercial passenger vessels (no more than 12 passengers). This authority has been delegated to the Maritime Administration per 49 CFR 1.66, Delegations to the Maritime Administrator, as amended. By this notice, MARAD is publishing information on a vessel for which a request for a U.S.-build waiver has been received, and for which MARAD requests comments from interested parties. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Vessel Proposed for Waiver of the U.S.-Build Requirement:

(1) Name of vessel and owner for which waiver is requested. Name of vessel: *Balboa Clipper*. Owner: Christopher L. Crowell.

(2) Size, capacity and tonnage of vessel. According to the applicant: "Size (length) 41 ft, Beam 12 ft 2 inches, Capacity 6 persons maximum, Tonnage 12.6."

(3) Intended use for vessel, including geographic region of intended operation and trade. According to the applicant: "Northeast New England Coast (Martha's Vineyard), Charters."

(4) Date and Place of construction and (if applicable) rebuilding. Date of construction: 1974. Place of construction: Taiwan, China.

(5) A statement on the impact this waiver will have on other commercial passenger vessel operators. According to the applicant: "The granting of this waiver would have little impact on existing passenger vessels in this area, specifically there are currently only 8 similar small vessels operating around the waters off Martha's Vineyard, and only one out of the harbor of Oak Bluffs which my vessel would operate."

(6) A statement on the impact this waiver will have on U.S. shipyards. According to the applicant: "Only one shipyard for building vessels currently exists in this area of the U.S. and it only builds wooden vessels. Therefore adverse impact locally would be non-existent. Since the boat requires yearly

hauling and maintenance, operation of this vessel for commercial passenger use (charters) would bring further business to the local shipyards."

Dated: June 26, 2001.

By Order of the Maritime Administrator.

Joel C. Richard,

Secretary, Maritime Administration.
