Therefore, this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 13132

The policy contained in this rule does not have any substantial direct effect on states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Nor does this rule impose substantial direct compliance costs on state and local governments. Therefore, consultation with the states is not required.

Regulatory Flexibility Act

This regulation will not have a significant economic impact on a substantial number of small entities. Additionally, the regulation does not require any more action on the part of small entities than is required on the part of large entities. The amount of work required by insurance companies will not increase because the information must already be collected under the present policy. No additional work is required as a result of this action on the part of either the insured or the insurance companies. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605), and no Regulatory Flexibility Analysis was prepared.

The administrative appeal provisions published at 7 CFR part 11 must be exhausted before any action for judicial review of any determination made by FCIC may be brought.

Environmental Evaluation

This action is not expected to have a significant economic impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Background

On Monday, September 25, 2000, FCIC published a notice of proposed rulemaking in the **Federal Register** at 65 FR 57562-57564 to revise 7 CFR § 457.151, Forage seeding crop insurance provisions, effective for the 2002 and succeeding crop years.

FCIC has made the following changes to the Forage Seeding Crop Provisions:

2. Section 13 corrected section references from section 12 to section 13 and changed the placement of the settlement of claim example within section 13 of the crop provisions.

* * * * *

1. Definitions

If the Special Provisions provide a sales closing date for both fall seeded and spring seeded practices for the insured crop and you plant any insurable fall seeded acreage, you may not change your crop insurance coverage after the fall sales closing date for the fall seeded practice.

4. Contract Changes.

In accordance with section 4 of the Basic Provisions, the contract change date is June 30 preceding the cancellation date for counties with a September 30 cancellation date; November 30 preceding the cancellation date for counties with a March 15 cancellation date; and April 30 preceding the cancellation date for all other counties.

13. Settlement of Claim.

(a) In the event of loss or damage covered by this policy, we will settle your claim on any unit by:

(1) Multiplying the insured acreage of each type and practice by the amount of insurance for the applicable type and practice;

(2) Totalling the results in section 13(a)(1);

(3) Multiplying the total acres with an established stand for the insured acreage of each type and practice in the unit by the amount of insurance for the applicable type and practice;

(4) Totalling the results in section 13(a)(3);

(5) Subtracting the result in section 13(a)(4) from the result in section 13(a)(2); and

(6) Multiplying the result in section 13(a)(5) by your share.

Example: Assume you have 100 percent share in 30 acres of type A forage in the unit, with an amount of insurance of \$100.00 per acre. At the time of loss, the following findings are established: 10 acres had a remaining stand of 75 percent or greater. You also have 20 acres of type B forage in the unit, with an amount of insurance of \$90.00 per acre. 10 acres had a remaining stand of 75 percent or greater. Your indemnity would be calculated as follows:

1. 30 acres × \$100.00 = \$3,000 amount of insurance for type A; 20 acres × \$90.00 = \$1,800 amount of insurance for type B;

2. \$3,000 + \$1,800 = \$4,800 total amount of insurance;

3. 10 acres with 75% stand or greater × \$100.00 = \$1,000 production to count for

type A: 10 acres with 75% stand or greater × \$90.00 = \$900 production to count for type B;

4. \$1,000 + \$900 = \$1,900 total production to count;

5. \$4,800 – \$1,900 = \$2,900 loss;

6. \$2,900 × 100 percent share = \$2,900 indemnity payment.

(b) The acres with an established stand will include:

(1) Acreage that has at least 75 percent of a normal stand;

(2) Acreage abandoned or put to another use without our prior written consent;

(3) Acreage damaged solely by an uninsured cause; or

(c) The amount of indemnity on any spring planted acreage determined in accordance with section 13(a) will be reduced 50 percent if the stand is less than 75 percent but more than 55 percent of a normal stand.

Signed in Washington, DC, on August 8, 2001.

Phyllis Honor,

Acting Manager, Federal Crop Insurance Corporation.
