joycec@od.nih.gov

This application relates to the identification of nucleic acid molecules that show temporal expression changes in prostate cancer during hormone withdrawal therapy and concomitant tumor regression and in the subsequent development of hormone-refractory prostate cancer (HPRC). More particularly, the invention relates to methods of diagnosing or prognosing the development or progression of prostate cancer by detecting abnormalities in from one to several HPRC-related genes.

This work has appeared, in part in Bubendorf et al., 2001, J. of the National Cancer Institute 91(20):1758.

Dated: September 4, 2001.

Fogarty International Center; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the Fogarty International Center Advisory Board.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications

and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Fogarty International Center Advisory Board.

Date: September 18, 2001.

Open: 8:30 am to 12:00 pm.

Agenda: Report of the Director and a presentation on the overview of the International programs of the Centers for Disease Control and Prevention. In addition, a presentation on Scientific Capacity Building to Improve Population Health: Knowledge as a Global Public Good.

Place: Lawton Chiles International House, 16 Center Drive, (Building 16), Bethesda, MD 20892.

Closed: 1:00 pm to Adjournment.

Agenda: To review and evaluate grant applications.

Place: Lawton Chiles International House, 16 Center Drive, (Building 16), Bethesda, MD 20892.

Contact Person: Irene W. Edwards, Information Officer, Fogarty International Center, National Institutes of Health, Building 31, Room B2C08, 31 Center Drive MSC 2220, Bethesda, MD 20892, 301-496-2075.

Information is also available on the Institute's/Center's home page: www.nih.gov/fic/about/advisory.html, where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Exclusive License: Virus-Like Particles for the Induction of Autoantibodies

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR

404.7(a)(1)(i), that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of an exclusive license to practice the invention embodied in: United States Patent Application 09/835,124 and its foreign equivalents entitled "Virus-Like Particles for the Induction of Autoantibodies" filed on April 13, 2001, with priority back to U.S. S/N 60/105,132, filed October 21, 1998 to Cytos Biotechnology AG, having a place of business in Zurich, Switzerland. The patent rights in this invention have been assigned to the United States of America.

DATES: Only written comments and/or application for a license which are received by the NIH Office of Technology Transfer on or before November 13, 2001 will be considered.

ADDRESSES: Requests for a copy of the patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Peter Soukas, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Email: ps193c@nih.gov; Telephone: (301) 496-7056, ext. 268; Facsimile: (301) 402-0220.

SUPPLEMENTARY INFORMATION: This invention claims compositions and methods for producing antibodies to tolerogens (self-antigens normally exposed to B cells that fail to induce an antibody response.) The compositions of the invention comprise multiple copies of a tolerogen (or at least one B cell epitope of a tolerogen) chimerized to viral virus-like particle in an orderly manner. This invention could potentially replace any treatment utilizing chronic administration of a monoclonal antibody that reacts with a self-antigen.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The field of use may be limited to alphavirus virus-like particle (VLP), Hepatitis B Virus (HBV)-capsid protein VLP, and bacteriophage Q β VLP, and Ty VLP vaccines.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments
