Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that two committees of the US EPA Science Advisory Board (SAB) will meet on the dates and times noted below. All times noted are Eastern Standard Time. All meetings are open to the public, however, seating is limited and available on a first come basis. Important Notice: Documents that are the subject of SAB reviews are normally available from the originating EPA office and are not available from the SAB Office—information concerning availability of documents from the relevant Program Office is included below.

#### 1. Research Strategies Advisory Committee (RSAC) October 16–17, 2001

The Research Strategies Advisory Committee (RSAC) of the US EPA Science Advisory Board (SAB), will meet on Tuesday and Wednesday, October 16–17, 2001 at EPA headquarters in room 6013 of the Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Washington, DC 20005. The meeting will begin by 8:30 a.m. and adjourn no later than 5 p.m. Eastern Standard time on both days.

The RSAC will conduct a review of two of EPA's Office of Research and Development's multiyear plans. The Committee is expected to review the Pollution Prevention and Water Quality Multiyear Plans, however, the specific multi-year plans to be reviewed are subject to change. EPA uses several means to develop and coordinate it's research activities and has recently developed Multiyear Plans for certain key research activities to describe the research ORD intends to accomplish to meet the long-term goals and objectives as set forth in the Agency's Strategic Plan. The Committee will also meet with Agency officials to discuss the Agency's FY 2002 budget and to begin to plan for its review of the President's FY 2003 S&T budget request for EPA.

*Charge to the Committee*—The charge questions for the review of the Multivear Plans are: (1) Does the multiyear plan convey the Office of Research and Development's strategic research plans for the subject area in an understandable fashion and at an appropriate level of detail?; (2) Do the long term goals and underlying science questions identified in the plan address the most important areas of scientific uncertainty in the subject area?; (3) Does the proposed scope of work proposed by the Office of Research and Development complement research by others?; (4) Would accomplishing the annual performance goals allow the Office of Research and Development to both achieve the long term goals and answer the science questions identified in the plan?; (5) Would accomplishing the annual performance measures clearly demonstrate that the associated annual performance goal was attained?; and (6) Does the plan clearly describe the outcomes that the Office of Research and Development will achieve through the proposed research

*For Further Information*—Members of the public desiring additional information about the meeting should contact Dr. Jack Fowle, Designated Federal Officer, Research Strategies Advisory Committee (RSAC), USEPA Science Advisory Board (1400A), Room 6450, 1200 Pennsylvania Avenue, NW, Washington, DC 20460; telephone/voice mail at (202) 564–4547; fax at (202) 501– 0582; or via e-mail at
