Electricity Market Design and Structure; Notice of Workshops

September 28, 2001.

A series of commissioner-led workshops will be held October 15 through October 19, 2001, beginning at 10 a.m., in the Commission meeting room at the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC.

The purpose of the workshops is to discuss core issues related to the development of efficient electric markets in an era where electric transmission systems will be operated by Regional Transmission Organizations. These issues include, but are not limited to, necessary market information, congestion management, cost recovery, market monitoring, transmission planning, business and reliability standards, the nature of transmission rights, and federal/state cooperation. The workshops will begin the process of developing a rulemaking on the market design and structure to be implemented through a pro forma tariff applicable to all public utilities and RTOs.

The workshops are open for the public to attend. There will be ample opportunity for public input in the rulemaking process, subsequent to the workshops. The Commission is inviting selected panelists on these topics to participate in these workshops; it is not at this time entertaining requests to make presentations. Additional details about the workshops will be provided in a subsequent notice, and will be posted on the Commission's web site under RTO Activities.

Conference on Energy Infrastructure; Notice of Conference

September 28, 2001.

The Federal Energy Regulatory Commission (FERC) will hold a conference on energy infrastructure

issues in the Western states on Friday, November 2, 2001 at the WestCoast Grand Hotel in Seattle Washington.

The conference will discuss the Western region's electric and gas infrastructure (electric generation and transmission, and fuel delivery, and storage), and related matters. The Governors of the western states have been invited to participate. The goal is to identify regional infrastructure issues and their implications for the future economic development of the region. We look forward to an informative discussion of the issues, and how we can facilitate and enhance a comprehensive collaborative approach to energy infrastructure development. It is our firm belief that until we have an adequate well-functioning energy infrastructure, we cannot expect workably competitive markets.

The one-day meeting will begin at 9:00 a.m. and will end about 4:00 p.m. This conference will follow a meeting of the western Committee on Regional Electric Power Cooperation (CREPC) at the same location.

All interested parties are invited to attend the conference on November 2.

We will issue further details on the conference, including the agenda and a list of participating discussants, as plans evolve. For additional information, please contact Saida Shaalan at 202-208-0278 or Saida.Shaalan@ferc.fed.us.

Abstract: The Disinfectants/Disinfection Byproducts, Chemical, and Radionuclides Rules ICR is the result of a consolidation of activities covered in the 1998 Stage 1 DBPR ICR, some rules and activities covered in the 1993 PWSS ICR and activities and rules previously covered in other OGWDW standalone ICRs. This ICR will include: Stage 1 DBPR(EPA ICR Number 1896.01, OMB Control Number 2040-0204), Chemical Phase Rules (Phases II/IB/V) (OMB Control Number 2040-0090, EPA ICR Number 0270.39), Unregulated Contaminant Monitoring Rule Lists 1 and 2 (OMB Control Number 2040-0208, EPA ICR Number 1882.02), 1976 Radionuclides and 2000 Radionuclides Rule (OMB Control Number 2040-0090, EPA ICR Number 0270.39), Total Trihalomethane Rule (OMB Control Number 2040-0090, EPA ICR Number 0270.39), and the Surface Water Treatment Rule (disinfectant residual monitoring only)(OMB Control Number 2040-0090, EPA ICR Number 0270.39). The Disinfectants/Disinfection Byproducts, Chemical, and Radionuclides Rules ICR requires information collection for data such as: Maximum contaminant levels (MCLs) for Stage 1 Disinfectants/Disinfection Byproducts for systems that treat their water with a chemical disinfectant, maximum residual disinfectant levels (MRDLs) for Chlorine, Chloramines, and Chlorine Dioxide, monitoring results for total organic carbon (TOC) and alkalinity for subpart H systems employing conventional filtration,
