SUPPLEMENTARY INFORMATION: The Appliance Labeling Rule was issued by the Commission in 1979, 44 FR 66466 (Nov. 19, 1979), in response to a directive in the Energy Policy and Conservation Act of 1975.¹ The Rule covers eight categories of major household appliances: Refrigerators and refrigerator-freezers, freezers, dishwashers, clothes washers, water heaters (this category includes storage-type water heaters, gas-fired instantaneous water heaters, and heat pump water heaters), room air conditioners, furnaces (this category includes boilers), and central air conditioners (this category includes heat pumps). The Rule also covers pool heaters, 59 FR 49556 (Sept. 28, 1994), and contains requirements that pertain to fluorescent lamp ballasts, 54 FR 28031 (July 5, 1989), certain plumbing products, 58 FR 54955 (Oct. 25, 1993), and certain lighting products, 59 FR 25176 (May 13, 1994, eff. May 15, 1995).

The Rule requires manufacturers of all covered appliances and pool heaters to disclose specific energy consumption or efficiency information (derived from the DOE test procedures) at the point of sale in the form of an "EnergyGuide" label and in catalogs. It also requires manufacturers of furnaces, central air conditioners, and heat pumps either to provide fact sheets showing additional cost information, or to be listed in an industry directory showing the cost information for their products. The Rule requires manufacturers to include, on labels and fact sheets, an energy consumption or efficiency figure and a "range of comparability." This range shows the highest and lowest energy consumption or efficiencies for all comparable appliance models so consumers can compare the energy consumption or efficiency of other models (perhaps competing brands) similar to the labeled model. The Rule also requires manufacturers to include, on labels for some products, a secondary energy usage disclosure in the form of an estimated annual operating cost based on a specified DOE national average cost for the fuel the appliance uses.

¹ 42 U.S.C. 6294. The statute also requires the Department of Energy (DOE) to develop test procedures that measure how much energy the appliances use, and to determine the representative average cost a consumer pays for the different types of energy available.

Section 305.8(b) of the Rule requires manufacturers, after filing an initial report, to report certain information annually to the Commission by specified dates for each product type.² These reports, which are to assist the Commission in preparing the ranges of comparability, contain the estimated annual energy consumption or energy efficiency ratings for the appliances derived from tests performed pursuant to the DOE test procedures. Because manufacturers regularly add new models to their lines, improve existing models, and drop others, the data base from which the ranges of comparability are calculated is constantly changing. To keep the required information consistent with these changes, under section 305.10 of the Rule, the Commission will publish new ranges if an analysis of the new information indicates that the upper or lower limits of the ranges have changed by more than 15%. Otherwise, the Commission will publish a statement that the prior ranges remain in effect for the next year.

New Ranges of Comparability for Refrigerators, Refrigerator-Freezers, and Freezers

The Commission has analyzed 2001 submissions of data for refrigerators, refrigerator-freezers, and freezers. Analysis of the submission indicates that the ranges for these products have changed significantly.³ Therefore, the Commission is publishing new ranges of comparability for refrigerators, refrigerator-freezers, and freezers. Today's publication of the new ranges for refrigerators, refrigerator-freezers, and freezers also means that, after February 19, 2002, manufacturers of these products must calculate the operating cost figures at the bottom of labels for the products using the 2001 cost for electricity (8.29 cents per kilowatt-hour).

Minor Amendments to Appendices H and I

The Commission is also amending the cost calculation formulas appearing in the Appendices (H and I) to part 305 that contain, for central air conditioners and heat pumps, heating and cooling performance costs and the ranges of comparability. These formulas must be provided on fact sheets and in directories so consumers can calculate their own costs of operation for the central air conditioners and heat pumps that they are considering purchasing.

² Reports for refrigerators, refrigerator-freezers, and freezers are due August 1.

³ New DOE energy conservation standards for these products became effective on July 1, 2001. 62 FR 23102 (April 28, 1997).

FEDERAL TRADE COMMISSION

16 CFR Part 305

Rule Concerning Disclosures Regarding Energy Consumption and Water Use of Certain Home Appliances and Other Products Required Under the Energy Policy and Conservation Act ("Appliance Labeling Rule")

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission ("Commission") amends its Appliance Labeling Rule by publishing new ranges of comparability to be used on required labels for refrigerators, refrigerator-freezers, and freezers. The Commission is also making minor, corrective amendments to the portions of Appendices H (Cooling Performance and Cost for Central Air Conditioners) and I (Heating Performance and Cost for Central Air Conditioners) to Part 305 that contain cost calculation formulas.

This amendment corrects some of the figures in the formulas to reflect the current Representative Average Unit Cost of Electricity—8.29 cents per kilowatt-hour—that was published by DOE on March 8, 2001 (66 FR 13917), and by the Commission on May 21, 2001 (66 FR 27856).

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a Regulatory Flexibility Act analysis (5 U.S.C. 603–604) are not applicable to this

proceeding because the amendments do not impose any new obligations on entities regulated by the Appliance Labeling Rule. Thus, the amendments will not have a “significant economic impact on a substantial number of small entities.” 5 U.S.C. 605. The Commission has concluded, therefore, that a regulatory flexibility analysis is not necessary, and certifies, under section 605 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that the amendments announced today will not have a

significant economic impact on a substantial number of small entities.

Cost Information for Appendices B1 Through B3

When the ranges of comparability in Appendices B1 through B3 are used on EnergyGuide labels for freezers, the estimated annual operating cost disclosure appearing in the box at the

bottom of the labels must be derived using the 2001 Representative Average Unit Cost for electricity (8.29¢ per kilowatt-hour), and the text below the box must identify the cost as such.

13. In section 2 of Appendix H of Part 305, the formula is revised to read as follows in both places that it appears:

Appendix H to Part 305—Cooling Performance and Cost for Central Air Conditioners

* * * * *

Your estimated cost =
$$\frac{\text{Listed average annual operating cost}^*}{1,000} \times \frac{\text{Your cooling load hours}^{**}}{1,000} \times \frac{\text{Your electrical rate in cents per KWH}}{8.29\text{¢}}$$

* * * * *

14. In section 2 of Appendix I of Part 305, the "NOTE" following the EnergyGuide label is amended by removing the figure "8.31¢" and by

adding, in its place, the figure "8.29¢". In addition, the formula in section 2 of Appendix I of Part 305 is revised to read as follows in both places that it appears:

Appendix I to Part 305—Heating Performance and Cost For Central Air Conditioners

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Food and Drug Administration****21 CFR Part 558****New Animal Drugs for Use in Animal Feeds; Arsanilic Acid; Technical Amendment****AGENCY:** Food and Drug Administration, HHS.**ACTION:** Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect the dose range of arsanilic acid for Type C medicated poultry feeds reported by the National Academy of Sciences/National

Research Council (NAS/NRC) Drug Efficacy Study in 1972. This action is being taken to improve the accuracy of the regulations.

DATES: This rule is effective November 19, 2001.

FOR FURTHER INFORMATION CONTACT:

Dianne T. McRae, Center for Veterinary Medicine (HFV-102), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-827-0212, e-mail: dmcrae@cvm.fda.gov.

SUPPLEMENTARY INFORMATION: FDA has found that the animal drug regulations do not reflect the dose range of arsanilic acid for Type C medicated poultry feeds reported to the agency by the NAS/NRC Drug Efficacy Study in 1972. At this time, the regulations are being amended in 21 CFR 558.62 to reflect a dose range of 45 to 90 grams per ton of medicated poultry feed.

Publication of this document constitutes final action on these changes under the Administrative Procedure Act (5 U.S.C. 553). Notice and public procedure are unnecessary because FDA is merely correcting nonsubstantive errors.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801-808.

SUMMARY: The Coast Guard is adopting permanent special local regulations for fireworks displays to be held over the waters of the Atlantic Ocean, Virginia Beach, Virginia. These special local regulations are necessary to provide for the safety of life on navigable waters during the fireworks displays. This action will temporarily restrict vessel traffic during the fireworks displays to protect spectator craft and other vessels transiting the event area from the dangers associated with the fireworks.
