Reclassification of Certain Inert Ingredients and Rhodamine B

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA intends to reclassify eight inert ingredients from List 2, "Potentially Toxic Inerts/High Priority for Testing" to List 1 "Inerts of Toxicological Concern." These eight inert ingredients have been determined to be animal carcinogens, thus meeting one of the criteria for reclassification. EPA also intends to reclassify the inert ingredient, Rhodamine B, from List 1 to List 4B, "inerts for which EPA has sufficient information to reasonably conclude that the current use pattern in pesticide products will not adversely affect public health or the environment." This reclassification is based on the Agency's determination that Rhodamine B when used as a dye in seed treatment is not likely to result in residues in food or feed; thus, meeting the criteria of List 4B.
