

Monday through Friday, except holidays, and may be published as part of the EIS. Individual respondents may request confidentiality. SUPPLEMENTARY INFORMATION: The creation of the Santa Rosa and San Jacinto Mountains National Monument along with the changing needs and interests of the public necessitates a separate stand-alone plan for the Monument. This action requires a maintenance action to BLM's California Desert Conservation Area Plan (as amended in 1980) to change its planning boundary and an amendment to the USFS's San Bernardino National Forest Land and Resource Management Plan. A management plan for the Santa Rosa and San Jacinto Mountains National Monument will facilitate coordination and efficiency between the BLM and USFS as joint Federal leads, and to focus collaborative efforts with state and local government, the Agua Caliente Band of Cahuilla Indians and interested public. This joint BLM-USFS planning document will require a single EIS and two separate Records of Decision (ROD).

Preliminary issues and management concerns have been identified by BLM and USFS personnel, other agencies, and in meetings with individuals and user groups. The preliminary issues identified thus far represent the USFS and BLM's knowledge to date on the existing issues and concerns with current management, but are not limited to these. The major issue themes that will be addressed in the plan effort include:

- Integrating monument management with community, tribal, and other agency needs.
- Recreation/visitor use and safety.
- Access and transportation on the public lands; management and

protection of public land resources; and balancing multiple uses.

After gathering public comments on what issues the plan should address, the suggested issues will be placed in one of three categories:

1. Issues to be resolved in the plan.
2. Issues resolved through policy or administrative action.
3. Issues beyond the scope of this plan.

Rationale will be provided in the plan for each issue placed in category two or three. In addition to these major issues, a number of management questions and concerns will be addressed in the plan. The public is encouraged to help identify these questions and concerns during the scoping phase.

An interdisciplinary approach will be used to develop the plan in order to consider the variety of resource issues and concerns identified. Disciplines involved in the planning process will include specialists with expertise in outdoor recreation, archaeology, paleontology, wildlife and plants, lands and realty, hydrology, soils, geographic information systems, rangeland management, minerals and geology, forestry, sociology and economics. Where necessary, outside expertise may be used.

Dated: October 11, 2001.

Danella George,

Acting Field Manager, Bureau of Land Management.

Gene Zimmerman,

Forest Supervisor, Forest Service, USDA.

Title: Ririe Reservoir Recreation Survey.

Abstract: Ririe Reservoir is located on Willow Creek, a minor tributary of the Snake River in Bonneville County of eastern Idaho. Ririe Reservoir has recreation attributes that serve Idaho Falls, Ririe, and southeastern Idaho, as well as out-of-state visitors. Primary summer activities consist of boating, swimming, fishing, camping, and picnicking. In general the survey will be used to determine carrying capacity for recreation uses on both Reclamation lands and water, and necessary management actions related to recreation, as identified in the Resource Management Plan for this reservoir. Further, the survey will determine if and when boat ramps, docks, trails, parking, and other facilities need to be expanded for recreation during the next 10 years and if the expansion can be accomplished without detriment to natural, recreational, and cultural resources.

Description of respondents: Ririe Reservoir recreationists from Idaho Falls, Ririe, southeastern Idaho, and an indeterminate diversity of out-of-state visitors to Ririe Reservoir.

Frequency: This is a one-time voluntary survey.

Estimated completion time: An average of 30 minutes per respondent.
Annual responses: 250 respondents.
Annual burden hours: 125.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Reclamation will display a valid OMB control number on the forms.
