SUPPLEMENTARY INFORMATION:

I. Abstract

Title 13, United States Code, Section 182, and Title 29, United States Code, Sections 1–9, authorize the collection of the CPS information. The Census Bureau and the Bureau of Labor Statistics sponsor the basic annual school enrollment questions, which have been collected annually in the CPS for 30 years.

This survey provides information on public/private elementary school, secondary school, and college enrollment, and on characteristics of private school students and their families, which is used for tracking historical trends, policy planning, and support. This years supplement contains additional questions about library use which are based on questions from the National Household Education Survey administered by the National Center for Education Statistics in 1996. Data about library staff, facilities, and resources exist as reported by libraries from other surveys; however, the questions of how and why households use these libraries are not addressed by these institutional data. The October 2002 Current Population Survey provides the opportunities to ask detailed questions about household library use. The questions are asked of each household and focus on how households use public libraries and whether public library activities are accessible to people with disabilities. This survey is the only source of national data on the age distribution and family characteristics of college students and the only source of demographic data on preprimary school enrollment. As part of the federal government's efforts to collect data and provide timely information to local governments for policymaking decisions, the survey provides national trends in enrollment and progress in school.

II. Method of Collection

The school enrollment information will be collected by both personal visit and telephone interviews in conjunction with the regular October CPS interviewing. All interviews are conducted using computer-assisted interviewing.

III. Data

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts a series of monthly, quarterly, and annual surveys as part of the Current Industrial Reports (CIR) program. The CIR surveys deal mainly with the quantity and value of shipments of particular products and occasionally with data on production and inventories; unfilled orders, receipts, stocks and consumption; and comparative data on domestic production, exports, and imports of the products they cover. These surveys provide continuing and timely national statistical data on manufacturing. The results of these surveys are used extensively by individual firms, trade associations, and market analysts in planning or recommending marketing and legislative strategies.

The CIR program includes both mandatory and voluntary surveys. Typically, the monthly and quarterly surveys are conducted on a voluntary basis and annual collections are mandatory. The collection frequency of individual CIR surveys is determined by

the cyclical nature of production, the need for frequent trade monitoring, or the use of data in Government economic indicator series. Some monthly and quarterly CIR surveys have an annual "counterpart" collection. The annual counterpart collects annual data on a mandatory basis from those firms not participating in the more frequent collection.

Due to the large number of surveys in the CIR program, for clearance purposes, the CIR surveys are divided into "waves." There are three waves that include the mandatory and voluntary surveys. Mandatory and voluntary surveys are divided into separate clearance requests, making six separate clearances. We are now combining the mandatory and voluntary surveys into one clearance request, reducing the total number of clearance requests from six to three. Each year, one wave is submitted for review. This year the Census Bureau plans to submit mandatory and voluntary surveys of Wave III for clearance. Also, because this is an economic census year, all voluntary annual surveys are made mandatory. The surveys are MA311D—"Confectionery", MA333N—"Fluid Power Products", and MA335L—"Electric Lighting Fixtures". MA333U—"Coin-Operated Vending Machines" is being discontinued because of a lack of funding. The surveys in Wave III are:

Mandatory surveys	Voluntary survey
M311H—Fats and Oils (Warehouse)	*M336G—Civil Aircraft and Aircraft Engines.
M311L—Fats and Oils (Renderers)	*MQ313D—Consumption on the Woolen System and Worsted Comb- ing.
M311M—Fats and Oils (Consumer)..	* These voluntary surveys have mandatory annual counterparts.
M311N—Fats and Oils (Producers)	
MQ313T—Broadwoven Fabrics (Gray).	
**MA311D—Confectionery.	
MA315D—Gloves and Mittens.	
MA327E—Consumer, Scientific, Technical, and Industrial Glassware.	
MA333D—Construction Machinery.	
MA333F—Mining Machinery.	
**MA333N—Fluid Power Products.	
MA334P—Communication Equipment.	
**MA335L—Electric Lighting Fixtures.	
**Voluntary annual surveys made mandatory during an economic cen- sus year.	

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect data. We ask respondents to return monthly report forms within 10 days, quarterly report forms within 15 days, and annual report forms within 30 days of the initial mailing. Telephone calls and/or letters encouraging participation will be mailed to respondents who have not responded by the designated time.
