

HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this proceeding is dispositive.

Determination To Revoke and Termination of Reviews

Because the ITC has issued a negative injury determination in the case of SRAMs from Taiwan, we are revoking the antidumping duty order on SRAMs from Taiwan. In addition, we are terminating the administrative reviews on SRAMs from Taiwan for the periods April 1, 1999, through March 31, 2000, and April 1, 2000, through March 31, 2001, and the new shipper review for the period April 1, 2000, through March 31, 2001. Accordingly, we will instruct the Customs Service to terminate suspension of liquidation on all entries of SRAMs from Taiwan from October 1, 1997, to the present and refund all duties deposited by importers plus interest where applicable pursuant to section 778 of the Act.

This notice also serves as the only reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of the return or destruction of APO materials is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Dated: January 8, 2002.

Faryar Shirzad,

Assistant Secretary for Import Administration.

RIN 0648-ZA91

NOAA Climate and Global Change Program, Program Announcement; Global Carbon Cycle Element, FY 2002

AGENCY: Office of Global Programs (OGP), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of request for applications.

SUMMARY: This notice serves the following purpose: To announce an opportunity for FY 2002 funding for the

Global Carbon Cycle program area. Details of program emphases and topic areas can be found below in supplementary information, and in the GCC program information sheet at: <http://www.ogp.noaa.gov/mpe/gcc/index/html>.

Potential applicants should look at the specific wording of the initial **Federal Register** notice (cited below in **SUPPLEMENTARY INFORMATION**).

DATES: Letters of intent must be received at the Office of Global Programs (OGP) no later than February 15, 2002.

Applicants who have not received a response to their letter of intent within two weeks should contact the Program Manager. Full proposals must be received at OGP no later than March 29, 2002, except for repeat hydrography proposals to be jointly considered with the National Science Foundation (NSF), which must be received no later than March 5, 2002, as noted below under supplementary information. We anticipate that review of full proposals will occur during April and May 2002. September 1, 2002, should be used as the proposed start date on proposals.

ADDRESSES: Applications should be sent to: Office of Global Programs, National Oceanic and Atmospheric Administration, 1100 Wayne Avenue, Suite 1210, Silver Spring, MD 20910-5603.

FOR FURTHER INFORMATION CONTACT: Irma duPree at the above address, phone: (301) 427-2089 ext. 107, e-mail: irma.dupree@noaa.gov.

SUPPLEMENTARY INFORMATION: The notice describing the Program and funding area descriptions for FY 2002 was published on May 16, 2001 (66 FR 27070-75) in a notice entitled NOAA Climate and Global Change Program. The program description, background and requirements, as well as guidelines for applications are included in that notice and are not repeated here.

Global Carbon Cycle (GCC): The U.S. Interagency Carbon Cycle Science Program (CCSP) seeks to answer two overarching questions: (1) How large and variable are the dynamic reservoirs and fluxes of carbon within the Earth system, and how might carbon cycling change and be changed in future years, decades and centuries?, and (2) What are our options for managing carbon sources and sinks to achieve an appropriate balance of risk, costs, and benefits to society? For more detailed information on interagency priorities, science planning and agency roles, please consult the Internet at: <http://www.carboncyclescience.gov>.

NOAA's participation in the CCSP focuses on three main goals: (1)

Quantifying spatial patterns and variability of carbon sources and sinks at global to regional scales; (2) Documenting the fate of anthropogenic CO₂ in the atmosphere and oceans; and (3) Improving future climate predictions by incorporating a dynamic understanding of the carbon cycle into models. To achieve these goals, the GCC program focuses on oceanic and atmospheric observations, process-oriented field studies and modeling. Information and current project abstracts can be found on the Internet at: <http://www.ogp.noaa.gov/mpe/gcc/index/html>

For FY 2002, GCC is soliciting projects in support of these goals in the following topic areas: (A) Global Distribution and Dynamics of Carbon Sources and Sinks; (B) Carbon budgets over North America and adjacent ocean basins; and (C) Synthesis, Modeling and Interpretative studies.

Global Distribution and Dynamics of Carbon Sources and Sinks: A variety of atmospheric, oceanic and terrestrial data has shown that the ocean and the terrestrial biosphere currently take up and store a significant portion of the carbon released to the atmosphere as a result of human activities. Preliminary progress has been made on locating sources and sinks of carbon on a regional basis and characterizing their magnitude and behavior over time. The results obtained thus far are at the limit of detection, however, and cannot be extended to many regions of the world due to lack of data.

In FY2002, GCC is seeking to augment the observational network in the ocean and atmosphere to fill in critical spatial and temporal gaps, as well as supporting research in network design, parameterization improvement, and data management.

Carbon Budgets over North America and Adjacent Ocean Basins: One region of uncertainty in the global carbon cycle budget is North America and the adjacent ocean basins. Recent studies indicate that the region may be currently taking up carbon at a significant level, however data and models needed to monitor budgets at the required spatial and temporal resolution are insufficient. Research advances now offer the opportunity to resolve the regional pattern of and mechanisms responsible for carbon dioxide uptake. In FY 2002, GCC is seeking to participate in a coordinated, interagency effort to conduct pilot observations, data assimilation, and network design in North America, and the North Atlantic and Pacific oceans.

Synthesis, Modeling and Interpretive Studies: In FY 2002, GCC is seeking

studies using empirical data and synthesized datasets, existing models, data assimilation techniques, and theory to advance the ability to quantify spatial patterns and variability of carbon sources and sinks at global to regional scales; document the fate of anthropogenic CO₂ in the atmosphere and oceans; and/or improve future climate predictions by incorporating a dynamic understanding of the carbon cycle into models.

For detailed information on the types of projects encouraged, please consult the GCC information sheet, posted on the Internet at: <http://www.ogp.noaa.gov/mpe/gcc/index.htm>. Contingent on available funding, projects awarded under this program announcement will be jointly supported by NOAA's Climate and Global Change and Climate Observations and Services Programs.

Contingent on available funding, this announcement serves as notice that NOAA and NSF will jointly consider proposals in FY 2002 to conduct a repeat hydrographic survey in support of the U.S. Carbon Cycle Science and CLIVAR Programs. Proposals for that topic should be submitted to NSF under Program Announcement NSF 02-016 via fastlane no later than March 5, 2002. Three paper copies should also be sent to NOAA/OGP by the same date.

For further technical information contact: Lisa Dilling at the above address, phone: (301) 427-2089 ext. 106, e-mail: dilling@gp.noaa.gov, or Krisa Arzayus, (301) 427-2089 ext. 183 e-mail: Krisa.arzayus@noaa.gov or see the web at: <http://www.lgp.noaa.gov/mpe/gcc/index/html>.

Other Requirements: The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreement contained in the Federal Register notice of October 1, 2001 (66 FR 49917) are applicable to this solicitation.

Classification: It has been determined that this notice is not significant for purposes of E.O. 12866.

It has been determined that this notice does not contain policies with Federalism implications as that term is defined in E.O. 13132.

Because notice and comment are not required under 5 U.S.C. 553, or any other law, for notices relating to public property, loans, grants, benefits or contracts, a Regulatory Flexibility Analysis, 5 U.S.C. 601 *et seq.*, is not required and has not been prepared for this notice.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a

collection of information subject to the Paperwork Reduction Act, unless that collection displays a currently valid Office of Management and Budget (OMB) control number. This notice involves collection-of-information requirements subject to the Paperwork Reduction Act. The use of Standard Forms 424, 424A, and SF-LLL have been approved by OMB under the respective control numbers 0348-0043, 0348-0044, and 0348-0046.

Authority: 49 U.S.C. 44720; 33 U.S.C. 883d, 15 U.S.C. 2904; 15 U.S.C. 2931 *et seq.*

David L. Evans,

Assistant Administrator, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

Financial Assistance for Marine Mammal Stranding Networks Through the John H. Prescott Marine Mammal Rescue Assistance Grant Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of solicitation for applications.

SUMMARY: The National Marine Fisheries Service (NMFS) (hereinafter "we" or "us") issues this document to solicit applications for Federal assistance under the John H. Prescott Marine Mammal Rescue Assistance Grant Program (Prescott Stranding Grant Program). This document describes how you can apply for funding under the Program, and how we will determine which applications will be funded.

Under the Prescott Stranding Grant Program, we will provide financial assistance (up to \$100,000 in Federal funds, with a 25 percent non-federal cost-sharing requirement) to eligible marine mammal stranding network participants for (1) the recovery or treatment of stranded marine mammals and (2) the collection of data from living or dead stranded marine mammals for scientific research regarding marine mammal health. Financial assistance will also be given for facility operation costs that are directly related to (1) and (2), above. Proposals will be reviewed, ranked within Regional or National

priority pools based on technical merit, and final selections will take into account other policy factors including level of priority, stranding needs, and equitable distribution of funds nationally.

DATES: We must receive your application by 5 p.m. (local time) March 15, 2002 in one of the offices listed in section I.I. (Applications Addresses) of this document. You must submit one signed original and two copies of the completed application (including supporting information). We will not accept facsimile or electronic applications.

ADDRESSES: You can obtain an application package from, and send your completed application(s) to, the NMFS Regional Administrator or the Protected Resources Office Director located at any of the offices listed in section I.I. Application Addresses of this document. You may also obtain the application package from the NMFS Protected Resources Home Page (see Section I.J. Electronic Access Addresses). However, we cannot accept completed applications electronically at this time.

FOR FURTHER INFORMATION CONTACT: Ms. Colleen Coogan or Dr. Teri Rowles, Marine Mammal Health and Stranding Response Program 301-713-2322 ext 144, or 178 or via e-mail: PrescottGrantFR.comments@noaa.gov

SUPPLEMENTARY INFORMATION:

I. Introduction

We are soliciting applications for Federal assistance pursuant to The Marine Mammal Rescue Assistance Act of 2000 which amended the Marine Mammal Protection Act (MMPA) to establish the John H. Prescott Marine Mammal Rescue Assistance Grant Program (16 U.S.C. 1421f-1) (hereafter referred to as the Prescott Stranding Grant Program). This document describes how you can apply for funding appropriated in fiscal years (FY) 2001 and 2002 under the Prescott Stranding Grant Program and how we will determine which applications will be funded.

A. Background

The Prescott Stranding Grant Program is conducted by the Secretary of Commerce to provide grants or cooperative agreements for eligible stranding network participants (see section I.E. of this document) for (1) recovery or treatment of marine mammals, (2) collection of data from living or dead stranded marine
