Take notice that on December 21, 2001, Columbia Gas Transmission Corporation (Columbia) tendered its filing in compliance with the Commission's November 21, 2001 Order (November 21 Order) in the above referenced docket. The Commission also approved the FirstEnergy contracts subject to certain conditions. In particular, the November 21 Order directed Columbia to make a compliance filing consistent with the terms of the November 21 Order within 30 days of the date of issuance of the order.

Columbia states that copies of its filing are available for inspection at its offices at 12801 Fair Lakes Parkway, Fairfax, Virginia; and 10 G Street NE., Suite 580, Washington, DC; and has been sent by first-class mail, postage prepaid, by Columbia to Columbia's firm customers, interruptible customers, affected state commissions, and to each of the parties on the official service list in Docket No. CP01-70-001 and 002.

Dominion Transmission, Inc.; Notice of Application

January 8, 2002.

Take notice that on December 28, 2001, Dominion Transmission, Inc. (DTI), 445 West Main Street, Clarksburg, West Virginia 26301, filed an abbreviated application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity to abandon storage Well No. AW-3697 in the Fink-Kennedy/Lost Creek Storage Complex in Lewis County, West Virginia. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at <http://www.ferc.gov> using the "RIMS" link, select "Docket#" and follow the instructions (call 202-208-2222 for assistance).

Storage Well AW-3697 is currently leaking a small amount of oil around the wellhead. DTI intends to plug the well to stop the leakage; thereby preventing the oil from being released and possibly increasing in the future. DTI claims the abandonment of the proposed facilities will have no significant impact on the environment. DTI will be using existing right-of-ways and access roads, and the appropriate erosion control and site restoration procedures.

Any questions regarding the application should be directed to Sean R. Sleight, Certificates Manager, Dominion Transmission, Inc., 445 West Main Street, Clarksburg, West Virginia 26301 at 304-627-3462 or sean_r_sleight@dom.com.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before January 29, 2002,

file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic

effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

Acting Secretary.
