IV. What Action is EPA Taking in this Notice?

EPA is making available for public viewing the revised risk assessments, which include some new information not available at the time of the preliminary risk assessments, and related documents for the pesticide, sodium acifluorfen. These documents have been developed as part of the pilot public participation process that EPA

and USDA are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process is to find a more effective way for the public to participate at critical junctures in the Agency's development of pesticide risk assessments and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, to increase transparency and opportunities for stakeholder consultation. The documents being released to the public through this notice provide some new information on the human health effects of sodium acifluorfen, and information on the revisions that were made to the sodium acifluorfen preliminary risk assessments, which were released to the public July 26, 2001 (66 FR 3904) (FRL-6789-4), through a notice in the **Federal Register**.

In addition, this notice starts a 45-day public participation period during which the public is encouraged to submit comments on the new information not available previously during the earlier public comment period for the sodium acifluorfen preliminary risk assessment, and risk management proposals or other comments on risk management for sodium acifluorfen. The Agency is providing an opportunity, through this notice, for interested parties to provide written comments on the new sodium acifluorfen health effects information as well as risk management proposals or ideas on sodium acifluorfen. Such comments and proposals could address ideas about how to manage dietary, occupational, or ecological risks on specific sodium acifluorfen use sites or crops across the United States or in a particular geographic region of the country. To address dietary risk, for example, commenters may choose to discuss the feasibility of lower application rates, increasing the time interval between application and harvest ("preharvest intervals"), modifications in use, or suggest alternative measures to reduce residues contributing to dietary exposure. For occupational risks, commenters may

suggest personal protective equipment or technologies to reduce exposure to workers and pesticide handlers. For ecological risks, commenters may suggest ways to reduce environmental exposure, e.g., exposure to birds, fish, mammals, and other non-target organisms. All comments and proposals must be received by EPA on or before May 28, 2002 at the addresses given under the **ADDRESSES** section. Comments and proposals will become part of the Agency record for the pesticide specified in this notice.
