

parties, and has executed a binding precedent agreement with one such party for firm storage service making use of 3 Bcf of the project's capacity for a primary term of ten years.

SGRM states that it is proposing to provide open-access firm and interruptible storage services to its customers, and is requesting authorization to charge market-based rates for such services. SGRM states that its market power study demonstrates that SGRM will not have market power in any relevant market.

Questions regarding the details of this proposed project should be directed to Jack W. Gatewood, Anthony J. Clark or Xavier Allemandou at SG Resources Mississippi, L.L.C., 7500 Felipe, Suite #600, Houston, Texas 77063 at (713) 914-8188 (phone), (713) 914-8189 (fax), jwgatewood@aol.com or James F. Bowe, Jr., Dewey Ballantine LLP, 1775 Pennsylvania Avenue, NW., Washington, DC 20006-4605, (202) 429-1444 (phone), (202) 429-1579 (fax), jbowe@dbllp.com.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before June 14, 2002, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to

the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

#### **Idaho Power Company; Notice of Availability of Environmental Assessment**

May 24, 2002.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Energy Projects has reviewed Idaho Power Company's application for license amendment for extension of temporary amendment of license, approved by the May 8, 2001, order, at the Milner Hydroelectric project, located on the Snake River in Twin Falls and Cassia Counties, Idaho, and has prepared an environmental assessment (EA). The project includes about 109 acres of federal land administered by the Bureau of Land Management.

The EA contains the staff's analysis of the potential environmental impacts of the proposed amendment and concludes that the approval of the proposed amendment would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA is attached to a Commission order issued on May 21, 2002 for the above application. Copies of the EA can be obtained by calling the Commission's Public Reference Room at (202) 208-1371. Copies of the EA can also be obtained through the Commission's homepage at <http://www.ferc.gov>.
