**Abstract:** The New Source Performance Standards (NSPS) for

Metallic Mineral Processing Plants were promulgated on February 21, 1984. These standards apply to the following facilities in Metallic Mineral Processing Plants: each crusher and screen in open-pit mines; each crusher, screen, bucket elevator, conveyor belt transfer point, thermal dryer, product packaging station, storage bin, enclosed storage area, truck loading and unloading station at the mill or concentrator, commencing construction, modification or reconstruction after the date of proposal.

Response to the collection of information is mandatory under 40 CFR part 60, subpart LL. Owners or operators of the affected facilities described must make initial notifications, including notification of any physical or operational change to an existing facility which may increase the regulated pollutant emission rate; notification of the demonstration of the continuous monitoring system (CMS), and notification of the initial performance test. Performance test reports are needed as these are the Agency's records of a source's initial capability to comply with emission standards, and note the operating conditions, flow rate and pressure drop, under which compliance was achieved. Owners of affected facilities are required to install, calibrate, maintain, and operate a continuous monitoring system to measure the change in the pressure of the gas stream through the scrubber and the scrubbing liquid flow rate. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Semiannual excess emissions reports and monitoring systems performance reports will include the exceeded findings of any control device operating parameters, (specified in 40 CFR 60.735, Recordkeeping and Reporting), the date and time of the deviance, the nature and cause of the malfunction (if known) and the corrective measures taken, and identification of the time period during which the CMS was inoperative.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, and retain the file for at least two years.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed

in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on October 29, 2001 (FR); no comments were received.

**Estimated Number of Respondents:** 44.

**Frequency of Response:** Semiannually.

**Estimated Total Annual Hour Burden:** 1,760 hours.

**Estimated Total Annualized Capital, O&M Cost Burden:** \$14,300.
