**SUPPLEMENTARY INFORMATION:** The DEIS addresses alternatives to resolve the

following major issues (revealed to date): Air quality, increased recreation, mining claims, birds and bats, big horn sheep, threatened or endangered species, cultural resources and traditional cultural properties, transportation, visual resources, noise, and socioeconomics.

The proposed action and alternatives can be summarized as: Proposed Action—Construct arrays containing a total of 153 wind turbine generators (WTGs) consisting of a combination of the two sizes of turbines identified in Alternatives A and B, and ancillary facilities; Alternative A—Construct arrays containing a total of 187 NEG Micon Model 900/52 WTGs and ancillary facilities; Alternative B—Construct arrays containing a total of 135 NEG Micon Model 1500 C WTGs and ancillary facilities; and Alternative C—No Action.

The proposed action is to construct, operate, and maintain a WGF producing 205-megawatts (MWs) and ancillary facilities on approximately 300 acres of public land within the Table Mountain WGF study area. The fully constructed WGF would consist of arrays containing a total of 153 WTGs. The WTGs installed would be a combination of the NEG Micon Model 900/52 (each producing 800 kilowatts) and NEG Micon 1500 C (each producing 1.5 MWs) turbines. Ancillary facilities consist of access roads, underground and overhead 34.5 kilovolt (kV) distribution lines, 230 kV electric transmission lines, an electric sub-station, a control building, and various temporary use areas. The WGF would operate 24 hours per day, 365 days a year, and produce in excess of 460 million kilowatt-hours annually. The anticipated life of the facility would be longer than 20 years. The rights-of way would be granted for 20 years with the right to renew.

Alternative A would essentially be the same as the Proposed Action but would consist of arrays containing a total of 187 NEG Micon Model 900/52 WTGs and ancillary facilities. Under Alternative A, there would be 22 percent more towers, turbines, and transformers. This would cause an increase in total of land disturbance as compared to the Proposed Action.

Alternative B would essentially be the same as the Proposed Action but would consist of arrays containing a total of 135 NEG Micon Model 1500 C WTGs and ancillary facilities. Under Alternative B, there would be 12 percent fewer towers, turbines, and transformers. This would cause a reduction in total acres of land

disturbance as compared to the Proposed Action.

Under the No Action Alternative, BLM would not issue right-of-way grants for the WGF and ancillary facilities. The WTGs, access roads, underground and overhead 34.5 kV distribution lines, 230 kV electric transmission lines, electric sub-station, control building, and various temporary use areas would not be constructed/ utilized. Wind resources at Table Mountain would remain undeveloped.

Public participation is occurring throughout the processing of this project. A Notice of Intent was filed in the **Federal Register** on December 29, 2000. Two rounds of public meetings consisting of three meetings each were held. Comments presented throughout the process have been considered.

## INTERNATIONAL TRADE COMMISSION

**[Investigations Nos. 701-TA-267 (Review Remand) and 731-TA-304 (Review Remand)]**

### Top-of-the-Stove Stainless Steel Cooking Ware From Korea

#### Determinations of Remand

On March 17, 2000, the Commission determined that the revocation of the countervailing and antidumping duty orders on top-of-the-stove stainless steel cooking ware from Korea would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.<sup>1</sup> Those determinations were appealed to the U.S. Court of International Trade.

On October 1, 2001, the Court affirmed the Commission's "domestic like product" determination and remanded the Commission's decision to cumulate subject imports from Korea and Taiwan.<sup>2</sup> On remand, the Commission again determines that revocation of the countervailing and antidumping duty orders on top-of-the-stove stainless steel cooking ware from

**DEPARTMENT OF LABOR**

**Office of the Secretary**

**Submission for OMB Review; Comment Request**

January 15, 2002.

The Department of Labor (DOL) has submitted the following public

information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35). A copy of each individual ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor. To obtain documentation contact Marlene Howze at ((202) 219-8904 or Email *Howze-Marlene@dol.gov*.

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for ESA, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395-7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- \* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

- \* Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- \* Enhance the quality, utility, and clarity of the information to be collected; and minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Type of Review:* Revision of a currently approved collection.

*Agency:* Employment Standards Administration (ESA).

*Title:* Report of Ventilatory Study (CM-907), Roentgenographic (CM-933), Roentgenographic Quality Rereading (CM-933b), Medical History and Examination for Coal Mine Workers' Pneumoconiosis (CM-988), Report of Arterial Blood Gas Study (CM-1159) and Report of Ventilatory Study (CM-2907).

*OMB Number:* 1215-0090.
