BILLING CODE 6718-04-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[I.D. 072302B]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Reopening of the Commercial Red Snapper Component

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Announcement of a reopening of a fishery.

SUMMARY: NMFS announces that the closed commercial fishery for red snapper in the exclusive economic zone (EEZ) of the Gulf of Mexico will reopen. Reopening of the fishery is necessary because the 2002 spring quota for red snapper has not been reached.

DATES: The commercial fishery for red snapper will reopen at noon, local time, August 1, 2002, and will close at noon, local time, August 7, 2002. The fishery will remain closed until noon, local time, October 1, 2002.

FOR FURTHER INFORMATION CONTACT: Phil Steele, telephone 727-570-5305, fax 727-570-5583, e-mail Phil.Steele@noaa.gov.

SUPPLEMENTARY INFORMATION: The reef fish fishery of the Gulf of Mexico is managed under the Fishery Management Plan for the Reef Fish

Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Gulf of Mexico Fishery Management Council and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act by regulations at 50 CFR part 622. Those regulations set the commercial quota for red snapper in the Gulf of Mexico at 4.65 million lb (2.11 million kg) for the current fishing year, January 1 through December 31, 2002. The red snapper commercial fishing season is split into two time periods, the first commencing at noon on February 1 with two-thirds of the annual quota (3.10 million lb (1.41 million kg)) available, and the second commencing at noon on October 1 with the remainder of the annual quota available. During the commercial season, the red snapper commercial fishery opens at noon on the first of each month and closes at noon on the 10th of each month, until the applicable commercial quotas are reached. The spring season was originally scheduled

to be closed at noon, local time, July 7, 2002, when NMFS projected the spring quota would be reached. However, inclement weather during the July 1–7, 2002, opening (abbreviated opening) and the 4th of July holiday limited fishing activities for red snapper in some areas of the Gulf and, therefore, the spring quota was not reached.

Under 50 CFR 622.43(a), NMFS is required to close the commercial fishery for a species or species group when the quota for that species or species group is reached, or is projected to be reached, by filing a notification to that effect in the **Federal Register**. Based on current statistics, NMFS has determined that the available commercial spring quota of 3.10 million lb (1.41 million kg) for red snapper will be reached when the fishery closes at noon, local time, August 7, 2002. Accordingly, the commercial fishery in the EEZ in the Gulf of Mexico for red snapper will remain closed until noon, local time, October 1, 2002. The operator of a vessel with a valid reef fish permit having red snapper aboard must have landed and bartered, traded, or sold such red snapper prior to noon, local time, August 7, 2002.

During the closure, the bag and possession limits specified in 50 CFR 622.39(b) apply to all harvest or possession of red snapper in or from the EEZ in the Gulf of Mexico, and the sale or purchase of red snapper taken from the EEZ is prohibited. In addition, the bag and possession limits for red snapper apply on board a vessel for which a commercial permit for Gulf reef fish has been issued, without regard to where such red snapper were harvested. However, the bag and possession limits for red snapper apply only when the recreational quota for red snapper has not been reached and the bag and possession limit has not been reduced to zero. The prohibition on sale or purchase does not apply to sale or purchase of red snapper that were harvested, landed ashore, and sold prior to noon, local time, August 7, 2002, and were held in cold storage by a dealer or processor.

Classification

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Dated: July 30, 2002.

John H. Dunnigan,

*Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.*

Fisheries of the Northeastern United States; Fishery Management Plan for the Summer Flounder, Scup, and Black Sea Bass Fisheries; Recreational Measures for the 2002 Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement recreational measures for the 2002 summer flounder, scup, and black sea bass fisheries. The implementing regulations for these fisheries require NMFS to publish recreational measures for the upcoming fishing year and to provide an opportunity for public comment. The intent of these measures is to prevent overfishing of the summer flounder, scup, and black sea bass resources.

DATES: Effective August 2, 2002.

ADDRESSES: Copies of supporting documents used by the Summer Flounder, Scup, and Black Sea Bass Monitoring Committees, the Regulatory Impact Review (RIR), the Final Regulatory Flexibility Analysis (FRFA) contained within the RIR, and the Environmental Assessment (EA) are available from the Northeast Regional Office at the following address: National Marine Fisheries Service, One Blackburn Drive, Gloucester, MA 01930–2298. The EA/RIR/FRFA is also accessible via the Internet at <http://www.nero.nmfs.gov/ro/doc/nr.htm>.

FOR FURTHER INFORMATION CONTACT: Richard A. Pearson, Fishery Policy Analyst, (978) 281–9279, fax (978) 281–9135, e-mail rick.a.pearson@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Summer Flounder, Scup, and Black Sea Bass Fisheries (FMP) and its implementing regulations (50 CFR part 648, subparts G, H, and I) describe the process for specifying annual recreational measures. Final specifications for the 2002 summer

flounder, scup, and black sea bass fisheries were published at 66 FR 66348, December 26, 2001. These specifications included a coastwide recreational harvest limit of 9.72 million lb (4.40 million kg) for summer flounder, 2.71 million lb (1.23 million kg) for scup, and 3.43 million lb (1.55 million kg) for black sea bass. A proposed rule to implement annual Federal recreational measures for the 2002 summer flounder, scup, and black sea bass fisheries was published at 67 FR 36139, on May 23, 2002, and contained management measures (i.e., minimum fish size, possession limit, and season) intended to keep annual recreational harvest from exceeding the specified harvest limits. For scup, one of the two alternatives that was being considered in the proposed rule is being implemented through this final rule (i.e., NMFS Scup Alternative 1). In the proposed rule, the proposed regulatory text for NMFS Scup Alternative 2 was published. The more stringent alternative was published in order to focus public comment on potential impacts of the two alternatives. However, no comments were received. Because Scup Alternative 1 has lower potential revenue losses associated with it, NMFS has selected Scup Alternative 1 for implementation in the final rule to minimize adverse economic impacts on small entities, yet still prevent the recreational harvest limit from being exceeded. Therefore, the regulatory text for the scup measures differ from those contained in the proposed rule. The recreational measures for black sea bass contained in this final rule are unchanged from those published in the proposed rule. Table 1 contains the coastwide Federal measures for scup and black sea bass that are being implemented. For summer flounder, this final rule implements conservation equivalency, as the process was described in the proposed rule. The management measures will vary according to the state of landing (see Table 2). A complete discussion of the development of the recreational measures appeared in the preamble of the proposed rule and is not repeated here.
