

Development Plan for the U.S. Consumer Product Safety Commission in Gaithersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Mr. Ernest Hall, Office of Portfolio Management, WPT, General Services Administration, NCR, 7th and D Streets, SW., Washington, DC, 20407; (202) 401-2354; e-mail at ernest.hall@hsa.gov.

SUPPLEMENTARY INFORMATION: The notice of availability is as follows:

Notice of Availability; Environmental Assessment and Finding of No Significant Impact for the Proposed Master Development Plan for the U.S. Consumer Product Safety Commission, Gaithersburg, Maryland

Reply to the Attention of: Mr. Ernest Hall, Office of Portfolio Management, WPT, General Services Administration, NCR, 7th & D Streets, SW., Washington, DC 20407. (202) 401-2354. E-mail: ernest.hall@hsa.gov.

The General Services Administration (GSA) is publishing a Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for the Proposed Master Development Plan for the U.S. Consumer Product Safety Commission (CPSC) in Gaithersburg, Maryland. The Final EA will be available for public review at the following locations:

GSA National Capital Region, 301 7th Street, SW., Room 7600, Washington, DC 20407.

The Gaithersburg Library, 8660 Montgomery Village Avenue, Gaithersburg, Maryland 20877.

Gaithersburg City Hall, 31 South Summit Avenue, Gaithersburg, MD 20877.

The GSA, acting as development manager for Federal facilities, proposed to adopt a Master Development Plan for the U.S. CPSC National Laboratory in Gaithersburg, Maryland. The plan includes a proposal to construct a Sample Storage Facility on the southeast quadrant of the site and to renovate and expand existing facilities. The proposed action would consist of constructing an 18,000 square foot Sample Storage Facility on the southeast quadrant of the site, and upgrading Buildings A, B, and C to meet CPSC specifications, including adding a connector between Buildings B and C. Interior renovations are required for Buildings E, F, G, and H to bring all aspects of the buildings up to current code requirements. Two additional small burn room areas will be added to the west end of Building G. The proposed action would also include relocating existing water lines, sewer lines, and electrical ducts.

When compared to the other build alternatives in the Final EA, the proposed action would result in the least amount of changes to the site, is the least costly to implement, and best meets CPSC's long-range needs. The proposed action will incorporate measures such as enhanced landscaping and a stormwater detention area to mitigate any permanent aesthetic or stormwater impacts of the proposed development and expansions/renovations.

Finding

Pursuant to the provision of GSA Order ADM 1095.1F, the PBS NEPA Desk Guide, and the regulations issued by the Council of Environmental Quality, (40 CFR parts 1500 to 1508), this is to advise you of our finding, based on the Final Environmental Assessment (EA), that the action described above is considered a major Federal action not significantly affecting the quality of the human environment.

Basis for Finding

The environmental impacts of constructing and operating the proposed facilities were considered in the Final EA pursuant to the National Environmental Policy Act (NEPA). The Final EA, which is available for review at the locations listed on page 1, is incorporated by reference in the FONSI. Constructing and operating the proposed project will not have a significant adverse affect on the human environment.

The EA documents the master planning process undertaken for the future use of the site. The direct, indirect, and cumulative impacts of the three build alternatives and the no action alternative were analyzed in accordance with the NEPA, and the Council on Environmental Quality (CEQ) regulations implementing NEPA. The Final EA analyzes the reasonably foreseeable environmental impacts that could result from the three build alternatives and the no action alternative.

Regardless of which build alternative is selected, all alternatives would involve temporary construction disturbances to the ambient air and noise environment, soils, and stormwater runoff from the site. However, Alternative 2 would involve substantially greater disruption affecting the entire site over a longer period of time. Alternative 3 would involve reducing the existing landscaping. Under the preferred alternative, improvements would affect less than 1/4 of the existing site and will incorporate measures such as enhanced landscaping

and a stormwater detention area to mitigate any permanent aesthetic or stormwater effects of the proposed CPSC development and renovations. To mitigate potential impacts, GSA will implement the measures that are discussed in the Environmental Assessment.

This Finding of No Significant Impact will become final thirty (30) days after publication in the **Federal Register** provided that no information leading to a contrary finding is received or comes to light during the 30-day public review period.

Donald C. Williams,

Regional Administrator, National Capital Region, U.S. General Services Administration.

BILLING CODE 6820-23-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics: Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Standards and Security.

Time and Date: 9 a.m. to 5 p.m., August 28, 2002. 9 a.m. to 3 p.m., August 29, 2002.

Place: Hubert H. Humphrey Building, Room 800, 200 Independence Avenue, SW., Washington, DC.

Status: Open.

Purpose: The Subcommittee on Standards and Security plans to solicit testimony from a panel of invited experts in medical terminologies to help the Committee define the scope and the criteria for recommendations on the selection of Patient Medical Record Information (PMRI) terminologies under the Health Insurance Portability and Accountability Act (HIPAA). On the second day the Subcommittee will hear from an expert panel about recent initiatives in the public and private sectors aimed at promoting and coordinating national activities for health data standards in support of achieving system interoperability and data comparability in order to meet clinical and public health needs. Additional general topics will include procedure codes and future health data standards recommendations to the HHS Secretary.

Contact Person for More Information: Substantive program information as well as summaries of meetings and a roster of Committee members may be obtained from Karen Trudel, Senior Technical Advisor, Security and Standards Group, Centers for Medicare and Medicaid Services, MS: C5-24-04, 7500 Security Boulevard, Baltimore, MD 21244-1850, telephone: 410-786-9937;

or Marjorie S. Greenberg, Executive Secretary, NCVHS, National Center for Health Statistics, Centers for Disease Control and Prevention, Room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone: (301) 458-4245. Information also is available on the NCVHS home page of the HHS Web site: <http://www.ncvhs.hhs.gov/> where an agenda for the meeting will be posted when available.

Dated: August 2, 2002.

James Scanlon,

Director, Division of Data Policy, Office of the Assistant Secretary for Planning and Evaluation.

Centers for Disease Control and Prevention

[30 DAY-45-02]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 498-1210. Send written

comments to CDC, Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project

The National Health and Nutrition Examination Survey (NHANES) (OMB No. 0920-0237)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC). The National Health and Nutrition Examination Survey (NHANES) has been conducted periodically since 1970 by the National Center for Health Statistics, CDC. The current cycle of NHANES began in February 1999 and will now be conducted on a continuous, rather than periodic, basis. About 5,000 persons will be examined annually. They will receive an interview and a physical examination. Participation in the survey is completely voluntary and confidential.

NHANES programs produce descriptive statistics which measure the health and nutrition status of the general population. Through the use of questionnaires, physical examinations, and laboratory tests, NHANES studies the relationship between diet, nutrition and health in a representative sample of the United States. NHANES monitors the prevalence of chronic conditions

and risk factors related to health such as coronary heart disease, arthritis, osteoporosis, pulmonary and infectious diseases, diabetes, high blood pressure, high cholesterol, obesity, smoking, drug and alcohol use, environmental exposures, and diet. NHANES data are used to establish the norms for the general population against which health care providers can compare such patient characteristics as height, weight, and nutrient levels in the blood. Data from NHANES can be compared to those from previous surveys to monitor changes in the health of the U.S. population. NHANES will also establish a national probability sample of genetic material for future genetic research for susceptibility to disease.

Users of NHANES data include Congress; the World Health Organization; Federal agencies such as NIH, EPA, and USDA; private groups such as the American Heart Association; schools of public health; private businesses; individual practitioners; and administrators. NHANES data are used to establish, monitor, and evaluate recommended dietary allowances, food fortification policies, programs to limit environmental exposures, immunization guidelines and health education and disease prevention programs. The estimated annualized burden for this data collection is 56,457 hours.

Respondent	Number of respondents	Number of responses/respondent	Average burden/response (in hours)
1. Screening interview only	13,333	1	0.120
2. Screener and family interviews only	500	1	0.400
3. Screener, family, and SP interviews only	882	1	1.020
4. Screener, family, and SP interviews and primary MEC exam only	5,000	1	6.020
5. Screener, household, and SP interviews, primary MEC exam and full MEC replicate exam	248	1	11.020
6. Home exam	75	1	1.850
7. Interview verification	1,333	1	0.080
8. Hepatitis C follow-up study	67	1	0.500
9. PSA follow-up study	175	1	0.500
10. Second Dietary Recall	4,653	1	0.500
11. Activity Monitor	3,000	1	0.750
12. Optional Telephone follow-up study	2,000	1	0.500
13. Optional Puerto Rican study	2,500	1	6.020

Dated: August 13, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning, and Evaluation, Centers for Disease Control and Prevention.
