

ENVIRONMENTAL PROTECTION AGENCY**[FRL-7138-3]****Meeting on Development of a Metals Assessment Framework****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice of meeting.

SUMMARY: EPA assesses the hazard and risk of metals and metal compounds in implementing its various legislative mandates. Public comments on recent Agency actions and examination of lead's bioaccumulation potential by an ad hoc technical panel of the Agency's Risk Assessment Forum have demonstrated the need for the development of comprehensive, cross-agency guidance for assessing the hazards and risks of metal and metal compounds that could be the basis for future Agency actions. The goal of this cross-agency guidance will be to articulate a consistent approach for assessing the hazards and risks of metals and metal compounds, based on application of all available data to a uniform and expanded characterization framework. This guidance will be applied to assessments of human health and ecological risk, ranging from site-specific situations to national assessments carried out for the purposes of priority setting, information collection, and/or air and water quality standards setting. This could involve reviewing a broad range of physico-chemical properties and may suggest more of a case-by-case (*i.e.*, metal by metal) approach to evaluating metals and metal compounds.

Under the auspices of the Agency's Science Policy Council, the Agency is embarking on the development of this assessment framework for metals. The first step in the process is formulation of an Action Plan that will identify key scientific issues specific to metals and metal compounds that need to be addressed by the framework, potential approaches to consider for inclusion in the framework including models and methods, an outline of the framework, and the necessary steps to complete the framework.

EPA is announcing a public meeting to provide an opportunity for interested parties to provide the Agency with information relevant to development of the framework. Eastern Research Group, Inc., (ERG) an EPA contractor, is organizing and convening the meeting. EPA is particularly interested in the public's perspectives on the following:

a. What organizing principles should the framework follow?

b. What scientific issues should the framework address?

c. What methods and models should be considered for inclusion in the framework?

d. What specific steps should be taken to further involve the public and the scientific community in the development of the framework?

The purpose of this meeting is for EPA to collect comments from the public. Therefore, although EPA staff will be present to accept the comments, EPA will not evaluate or respond to comments at the meeting. In addition, although EPA will review the comments submitted as it proceeds, it will not formally respond to each individual comment. EPA is not reconsidering any past Agency actions, and therefore EPA is not soliciting comments on past Agency actions. Because EPA is not soliciting comments on past Agency actions, comments regarding past Agency actions will not be considered.

EPA plans to provide the Action Plan to the Science Advisory Board in a consultation. Following the consultation, EPA will proceed with development of the framework which will be subsequently reviewed by the Science Advisory Board.

DATES: The public meeting will be held Wednesday, February 20, 2002 from 9 a.m. to 4 p.m. EPA urges participants to register with ERG by February 14, 2002 to attend.
