

OMB approved the collection of information in the children's sleepwear standards and implementing regulations under control number 3041-0027. OMB's most recent extension of approval will expire on January 31, 2003. The Commission proposes to request an extension of approval without change for the collection of information in the children's sleepwear standards and implementing regulations.

### B. Estimated Burden

The Commission staff estimates that about 53 firms manufacture or import products subject to the two children's sleepwear flammability standards. The Commission staff estimates that these standards and implementing regulations will impose an average annual burden of about 6,000 hours on each of those firms. That burden will result from conducting the testing required by the standards and maintaining records of the results of that testing required by the implementing regulations. The total annual burden imposed by the standards and regulations on all manufacturers and importers of children's sleepwear will be about 318,000 hours. The hourly wage for the testing and recordkeeping required by the standards and regulations is about \$30.03, for an annual cost to the industry of about \$9,550,000.

The Commission will expend approximately three months of professional staff time annually for examination of information in the records maintained by manufacturers and importers of children's sleepwear subject to the standards. The annual cost to the Federal government of the collection of information in the sleepwear standards and implementing regulations is estimated to be \$22,500.

### C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be

minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.
