

and effective September 16, 2001, which is incorporated by reference in 14 CFR part 71.1. The Class E designation listed in this document will be published subsequently in the Order.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes Class E5 airspace at Batesville, MS.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation, as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

[Airspace Docket No. 02–ASO–2]

Establishment of Class E Airspace; Andrews—Murphy, NC; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correcting amendments.

SUMMARY: This document contains a correction to the final rule (00–ASO–4), which was published in the **Federal Register** of March 31, 2000, (65 FR 17133), establishing Class E airspace at Andrews—Murphy, NC. This action corrects an error in the geographic coordinates for the Class E5 airspace at Andrews—Murphy, NC.

EFFECTIVE DATE: Effective 0901 UTC, April 18, 2002.

FOR FURTHER INFORMATION CONTACT:

Walter R. Cochran, Manager, Airspace Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5627.

SUPPLEMENTARY INFORMATION:

Background

Federal Register Document 00–7959, Airspace Docket No. 00–ASO–4, published on March 31, 2000, (65 FR 17133), established Class E5 airspace at Andrews—Murphy, NC. An error was discovered in the geographic coordinates describing the Class E5 airspace area. What should have been latitude 35 degrees was published as 34 degrees. This action corrects that error.

Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of

FAA Order 7400.9J, dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Need for Correction

As published, the final rule contains an error which identifies an incorrect geographical position for the location of the Class E5 airspace area. Accordingly, pursuant to the authority delegated to me, the geographic coordinates for the Class E5 airspace area at Andrews—Murphy, NC, incorporated by reference at § 71.1, 14 CFR 71.1, and published in the **Federal Register** on March 31, 2000, (65 FR 17133), is corrected by making the following correcting amendment.

[Airspace Docket No. 01-ASO-18]

Establishment of Class E5 Airspace; Andrews, SC

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E5 airspace at Andrews, SC. A Non-Directional Beacon (NDB) Runway (RWY) 36 Standard Instrument Approach Procedure (SIAP) has been developed for Robert F. Swinnie Airport, Andrews, SC. As a result, controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to contain the SIAP and other Instrument Flight Rules (IFR) operations at Robert F. Swinnie Airport. The operating status of the airport will change from Visual Flight Rules (VFR) to include IFR operations concurrent with the publication of the SIAP.

EFFECTIVE DATE: 0901 UTC, April 18, 2002.

SUPPLEMENTARY INFORMATION:

History

On December 27, 2001, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing Class E5 airspace at Andrews, SC, (66 FR 66832) to provide adequate controlled airspace to contain the NDB RWY 36 SIAP and other IFR operations at Robert F. Swinnie Airport. Class E airspace designations for airspace extending upward from 700 feet or more above the surface of the earth are published in FAA Order 7400.9J, dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) establishes Class E5 airspace at Andrews, SC.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation, as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Amendment of Restricted Area 5201, Fort Drum, NY

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the designated altitudes for Restricted Area R-5201 (R-5201), Fort Drum, NY, by designating the ceiling of the airspace at 23,000 feet mean sea level (MSL) on a year-round basis. Currently, the upper altitude limit for the restricted area changes from 23,000 feet MSL for the period April 1 through September 30 to 20,000 feet MSL for the period October 1 through March 31. Increased training requirements at Fort Drum have resulted in a regular need for restricted airspace up to 23,000 feet MSL throughout the year. This modification does not alter the current boundaries, time of designation, or activities conducted in R-5201.

EFFECTIVE DATE: 0901 UTC, April 18, 2002.
