

expertise in various aspects of reproductive and developmental toxicology and other relevant areas of science. The expert panel meeting will be open to the public with time scheduled for oral public comment.

Ethylene glycol is a high production volume chemical used chiefly in antifreeze for heating and cooling systems. There is widespread exposure to ethylene glycol due to its use as an automotive antifreeze and as a de-icer for aircraft. The toxicology database on ethylene glycol includes recent mechanistic data and occupational exposure information. Propylene glycol, similar in structure to ethylene glycol, is used as an antifreeze, de-icing solution, and in various paints and coatings. Unlike ethylene glycol, propylene glycol is approved for use in various food additives, drugs, and cosmetics.

Request for Public Input

The CERHR invites input from the public and other interested parties on ethylene glycol and propylene glycol including toxicology information from completed and ongoing studies, information on planned studies, as well as information about current production levels, human exposure, use patterns, and environmental occurrence. Information and comments should be forwarded to the CERHR at P.O. Box 12233, MD EC-32, Research Triangle Park, NC 27709 (mail), (919) 541-3455 (phone), (919) 316-4511 (fax), or shelby@niehs.nih.gov (email). Information and comments received by May 6, 2002 will be made available to the CERHR staff and the expert panel for consideration in the evaluation.

The CERHR also invites nominations of qualified scientists to serve on the expert panel for the ethylene glycol/propylene glycol evaluation. Panelists are primarily drawn from the CERHR Expert Registry and/or the nomination of other scientists who meet the criteria for listing in that registry. Criteria for listing in the CERHR Expert Registry include: formal academic training and experience in a relevant scientific field, publications in peer-reviewed journals, membership in relevant professional societies, certification by an appropriate scientific Board or other entities, and participation in similar committee activities. All panel members serve as individual experts in their specific areas of expertise, not as representatives of their employer or other organization. Scientists on the expert panel will represent a wide range of expertise including developmental toxicology, reproductive toxicology, epidemiology, general toxicology, pharmacokinetics, exposure assessment, and biostatistics.

Nominations received by May 6, 2002 will be considered for the Ethylene Glycol/Propylene Glycol Expert Panel and inclusion in the CERHR Expert Registry. Nominations should be forwarded to the CERHR at the address given above.

Additional Information about CERHR

The NTP and the NIEHS established the CERHR in June 1998 [FR (Vol. 63, No. 239, p. 68782, December 1998)]. The purpose of the CERHR is to provide scientifically-based, uniform assessments of the potential for adverse effects on reproduction and development caused by agents to which humans may be exposed. The CERHR also serves as a resource for information on various environmental exposures and their potential to affect pregnancy and child development. Its Web site (<http://cerhr.niehs.nih.gov>) has information about common concerns related to fertility, pregnancy and the health of unborn children, and links to other resources for information about public health.

The CERHR follows a formal, open process for the selection and review of chemicals nominated for evaluation of potential reproductive and/or developmental hazards. This process includes an evaluation of the chemical(s) by an external scientific panel that follows specific guidelines in conducting its assessment and provides multiple opportunities for public input. As a final step in the process, the CERHR publishes a NTP-CERHR report on each chemical that includes the expert panel report, public comments, and a NTP brief. A summary of the review process was recently published in the **Federal Register** (Vol. 66, No. 136, pp. 37047-37048, July 16, 2001). The process and guidelines are posted on the CERHR Web site and are available in hard copy by contacting the CERHR (address provided above). The CERHR welcomes the nomination of chemicals to be considered for future evaluation or qualified scientists for its expert registry. These nominations can be made through the CERHR Web site or by contacting the CERHR directly (see address above).

Dated: February 8, 2002.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories currently certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (59 FR 29916, 29925). A notice listing all currently certified laboratories is published in the **Federal Register** during the first week of each month. If any laboratory's certification is suspended or revoked, the laboratory will be omitted from subsequent lists until such time as it is restored to full certification under the Guidelines.

If any laboratory has withdrawn from the National Laboratory Certification Program during the past month, it will be listed at the end, and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at the following websites: <http://workplace.samhsa.gov>; <http://www.drugfreeworkplace.gov>.

FOR FURTHER INFORMATION CONTACT: Mrs. Giselle Hersh or Dr. Walter Vogl, Division of Workplace Programs, 5600 Fishers Lane, Rockwall 2 Building, Room 815, Rockville, Maryland 20857; Tel.: (301) 443-6014, Fax: (301) 443-3031.

SUPPLEMENTARY INFORMATION:

Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100-71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection.

To maintain that certification a laboratory must participate in a quarterly performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are not to be considered as meeting the minimum requirements expressed in the HHS

Guidelines. A laboratory must have its letter of certification from SAMHSA, HHS (formerly: HHS/NIDA) which attests that it has met minimum standards.

In accordance with Subpart C of the Guidelines, the following laboratories meet the minimum standards set forth in the Guidelines:

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. DHHS, with the DHHS' National Laboratory Certification Program (NLCP) contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, the DHHS will recommend that DOT certify the laboratory (**Federal Register**, July 16, 1996) as meeting the minimum standards of the "Mandatory Guidelines for Workplace Drug Testing" (59 FR, June 9, 1994, pages 29908-29931). After receiving the DOT certification, the laboratory will be included in the monthly list of DHHS certified laboratories and participate in the NLCP certification maintenance program.

2002 Industry Awards Program and Luncheon

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of 2002 Industry Awards Program and Luncheon.

SUMMARY: This notice announces the 2002 Industry Awards Program and Luncheon. This is the 20th year that MMS will honor outstanding companies for their exemplary safety and pollution prevention records, and is the fourth year for our MMS-wide industry awards program.

DATES: The awards program and luncheon will be held on Thursday, April 11, 2002.

ADDRESSES: The program and luncheon will be held at the Hotel Inter-Continental Houston, 2222 West Loop South, Houston, Texas 77027. The hotel's phone number is (713) 961-7272. To obtain registration information, please log onto the MMS temporary Web site at: http://www.temporarygomr.com/hq/industry_awards.html

FOR FURTHER INFORMATION CONTACT:

Offshore Minerals Management, Debbie O'Brien at 703-787-1579; Marcia Oliver at (703) 787-1043; Minerals Revenue Management, David Izon at 202-208-

3731; Jan Therildsen at (303) 231-3604; or Mary Louise Miller at (303) 231-3386.

SUPPLEMENTARY INFORMATION: This is the 20th year that MMS will honor outstanding companies for their exemplary safety and pollution prevention records, and is the fourth year for our MMS-wide industry awards program.

The following awards will be presented:

- Corporate Leadership Award (CORLA) recognizing Corporation employees for performing an act or service that enhances MMS's ability to meet Offshore or Minerals Revenue Management mission objectives.
- Corporate Citizen Award (CORCIT) recognizing lessees that have provided the most outstanding performance across MMS—in both offshore operational safety and mineral revenues financial compliance.

- Secretary of the Interior's Mineral Revenues Stewardship Award recognizing exceptional performance by companies that report production and pay royalties for Federal and Indian minerals leases. A company's outstanding performance is reflected by low error rates, timely payment, and responsiveness to compliance and enforcement requests and orders.

- Safety Award for Excellence (SAFE) recognizing OCS oil and gas facility operators and contractors for outstanding safety and pollution prevention performance. It also highlights companies that conduct offshore oil and gas activities safely and in a pollution-free manner, although such activities are complex and carry a significant element of risk. The SAFE Award Categories are as follows:

- High Activity
- Moderate Activity
- Contractor—Drilling
- Contractor—Production

Dated: February 15, 2002.
