Title: NSPS Subpart Da—Standards of Performance for Electric Utility Steam Generating Units (OMB Control Number 2060–0023, EPA ICR No. 1053.07). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Owners or operators of electric utility steam generating units subject to NSPS Subpart Da must make one-time notification of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. They must also submit a report on initial performance test results, monitoring results, and excess emissions. Records must be maintained of startups, shutdowns, malfunctions, periods when the continuous monitoring system is inoperative, and of various fuel combustion and pollutant emission parameters.

The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. Performance test reports are needed as these are the Agency's records of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. The monitoring and excess emissions reports are used for problem identification, as a check on source operation and maintenance, and for compliance determination. The information collected from recordkeeping and reporting requirements are used for targeting inspections, and for other uses in compliance and enforcement programs.

Responses to these information collections are deemed to be mandatory, per section 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 4000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 85 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of electric utility steam generating units subject to Subpart Da.

Estimated Number of Respondents: 655.

Frequency of Response: Semiannually, quarterly.

Estimated Total Annual Hour Burden: 33,553.

Estimated Total Annual Cost: \$19,490,000, includes \$2,200,000 annualized capital and \$9,660,000 O&M costs.

Changes in the Estimates: There is an increase of 104,947 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an increase in the size of the regulated universe.

Dated: February 19, 2003.

Director, Collection Strategies Division.

Title: Federal Emission Guidelines For Existing Municipal Solid Waste Landfills (Small) (40 CFR part 62, subpart GGG) (OMB Control Number 2060-0430, EPA ICR Number 1893.03). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the

collection of information while this submission is pending at OMB.

Abstract: The Environmental Protection Agency (EPA) is charged under section 111 of the Clean Air Act, as amended, to collect data. The information will be used by Agency enforcement personnel to (1) identify existing sources subject to these standards; (2) ensure that Best Demonstrated Technology is being properly applied; and (3) ensure that the emission control device is being properly operated and maintained on a continuous basis. In addition, records and reports are necessary to enable the EPA to identify landfills that may not be in compliance with these standards. Based on reported information, the EPA can decide which landfills should be inspected and what records or processes should be inspected at the landfill. The records that landfills maintain would indicate to the EPA whether the personnel are operating and maintaining control equipment properly. The type of data required is principally emissions data and would not be confidential. If any information is submitted to the EPA for which a claim of confidentiality is made, the information would be safeguarded according to the Agency policies set forth in 40 CFR, chapter 1, part 2, subpart B.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on November 7, 2002. No comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 12 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search data sources; complete and review the collection of information;

and transmit or otherwise disclose the information.

Respondents/Affected Entities: 173.

Estimated Number of Respondents: 173.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 11,678.

Estimated Total Annual Cost:

\$659,428 includes \$242,000 for Operating and Maintenance costs.

There is a decrease of 3,432 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to recalculations, correction of high estimates of affected landfills, and no new respondents.

Dated: February 21, 2003.
