

signalmen. Once this study is complete, the BRS will continue to work with the FRA and the rail industry in order to promote work schedules that will reduce the fatigue level of railroad signalmen. The BRS also hopes that after this study is completed, the FRA diligently moves forward in their effort to examine the effects of fatigue on other non-operating crafts, such as, but not limited to: track maintenance personnel, locomotive and car repair personnel; and telecommunications personnel."

The second comment or letter that FRA received came from the American Train Dispatchers Department (ATDD). The ATDD also supports the proposed study and observed: "The ATDD applauds the efforts of the Federal Railroad Administration and supports them in proposing a study, which will focus on the cause and effect of fatigue issues that influence the performance of duties and responsibilities of signalmen. Their analysis of data can only contribute to the understanding of this most important issue, which will benefit not only signalmen, but many other non-operating crafts as well."

The third and final comment or letter that FRA received came from the Brotherhood of Maintenance of Way Employees (BMWE). The BMWE too supports the proposed study and stated the following: "Fatigue continues to be a factor for the non-operating crafts within the rail industry, especially in view of working conditions, expanded territories, frequent changes in workweek and starting times, erratic call schedules, etc. Members of the BRS, like those of the BMWE, are subject to a number of work schedule-related factors which can lead to fatigue induced accident and incidents. As such, we support the study contemplated in the above-referenced notice to assist FRA and the rail industry in understanding the impact of work schedules, territory size, call schedules, working conditions, and other factors which may contribute to BRS employee fatigue. Based on the anticipated success of the BRS study, BMWE believes FRA should systematically and individually examine the cause and effect of fatigue on other non-operating crafts, inclusive of BMWE." None of these three comments addressed the issue of burden hour estimates or burden cost estimates. After carefully reviewing these comments, DOT announces that these information collection activities have been reevaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of

information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507 (b)-(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden, and are being submitted for clearance by OMB as required by the PRA.

Title: Work Schedules and Sleep Patterns of Railroad Signalmen.

OMB Control Number: 2130-NEW.

Type of Request: New collection.

Affected Public: Rail workers.

Abstract: In a continuing effort to improve rail safety and to reduce the number of injuries and fatalities to rail workers, FRA and the rail industry have recently focused on the issue of fatigue among train and engine crew personnel. Because railroading is an around-the-clock, seven-days-a-week operation and because a wide array of workers are needed to both operate and to maintain the nation's railroads, other crafts—besides train and engine crews—can also be subject to fatigue. The non-operating crafts, including locomotive and car repair, track maintenance, signal system maintenance and telecommunications, fall into this second category. FRA is proposing a study which will focus on signalmen, one of the non-operating crafts. FRA seeks to develop an understanding of the work schedule-related fatigue issues that affect signalmen. The proposed study has two primary purposes: (1) It aims to document and characterize the work/rest schedules and sleep patterns of the signalmen; and (2) It intends to examine the relationship between these schedules and level of alertness/fatigue for the individuals who work these schedules. Subjective ratings from participants of their alertness/sleepiness on both work and non-work days will be an integral part of this study. The data will be collected through the use of a daily diary or log, as well as a brief background questionnaire for each participant. Analysis of the diary data

will allow FRA to assess whether or not there are any work-related fatigue issues for signalmen.

Annual Estimated Burden Hours: 850 hours.

Addressee: Send comments regarding this information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 Seventeenth Street, NW., Washington, DC, 20503, Attention: FRA Desk Officer.

Comments are invited on the following: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

Authority: 44 U.S.C. 3501-3520.

Issued in Washington, DC, on March 13, 2003.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Docket No. FRA-2003-14363

Applicant: Union Pacific Railroad Company, Mr. Phil Abaray, Chief Engineer—Signals, 1416 Dodge Street, Room 1000, Omaha, Nebraska 68179-1000.

The Union Pacific Railroad Company (UP) seeks approval of the proposed reduction to the limits of the traffic control system on the single main track between C.P. F910, milepost 10.1, and C.P. F909, milepost 8.5, near Milpitas, California, on the Milpitas Subdivision, Roseville Area. The proposed changes include removal of northbound signal 506L and southbound signal 101 at C.P. F910, removal of southbound signal 504R at C.P. F909, and installation of "Entering CTC," "Leaving CTC," and "End of Block" signs at milepost 8.5.

The reasons given for the proposed changes are that the signal system is no longer required in the yard area and presently inhibits switching operations, the affected area is no longer used for through trains, and the track will be used for switching moves, service to local industries, and the storage of cars.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

All communications concerning this proceeding should be identified by the docket number and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, SW., Washington, DC 20590-0001. Communications received within 45 days of the date of this notice will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the internet at the docket facility's Web site at <http://dms.dot.gov>.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, DC, on March 7, 2003.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Docket No. FRA-2003-14364

Applicant: Union Pacific Railroad Company, Mr. Phil Abaray, Chief Engineer—Signals, 1416 Dodge Street, Room 1000, Omaha, Nebraska 68179-1000.

The Union Pacific Railroad Company (UP) seeks approval of the proposed discontinuance and removal of the automatic block signal system between milepost 4.1, and milepost 8.3 near Warm Springs, California, on the Warm Springs Subdivision, Roseville Area. The proposed changes include removal of northbound signals 53, 65, and 83, removal of southbound signals 40, 52, and 64, and installation of "End of Block," "Entering ABS," and "Leaving ABS" signs at milepost 4.1 and milepost 8.3.

The reasons given for the proposed changes are that the signal system is no longer required in the yard area and presently inhibits switching operations; the track will be used for switching movements, arrival and departures from the Warm Springs and Milpitas yards, service to local industries, and the storage of cars.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

All communications concerning this proceeding should be identified by the docket number and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, SW., Washington, DC 20590-0001. Communications received within 45 days of the date of this notice will be considered by the FRA before final action is taken. Comments received after

that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the internet at the docket facility's Web site at <http://dms.dot.gov>.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, DC, on March 7, 2003.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[FTA Docket No. FTA-2003-14691]

Notice of Request for the Extension of Currently Approved Information Collections

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the Federal Transit Administration (FTA) to request the Office of Management and Budget (OMB) to extend the following currently approved information collections: 49 U.S.C. section 5312(a) Research, Development, Demonstration and Training Projects.

DATES: Comments must be submitted before May 19, 2003.

ADDRESSES: All written comments must refer to the docket number that appears at the top of this document and be submitted to the United States Department of Transportation, Central Dockets Office, PL-401, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 10 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard/envelope.
