

current evaluation tools to be in compliance, while still collecting information needed for the cross-site assessment.

The goal underlying the training and education opportunities provided through the ATTCS is to enhance the competencies of professionals in a variety of disciplines to address the clinical needs of individuals with substance abuse problems using research-based curricula and training materials through both traditional and non-traditional technologies.

The ATTCS disseminate current health services research from the National Institute on Drug Abuse, National Institute on Alcohol Abuse and Alcoholism, National Institute of Mental Health, Agency for Health Care Policy and Research, National Institute of Justice, and other sources and applied knowledge development activities from SAMHSA using innovative technologies by developing and updating state-of-the-art research-based curricula and developing faculty and trainers. Participants in ATTCS events are self-identified and participate in either academic courses, continuing education/professional development training events, technical assistance or

meetings. Academic courses are offered at all levels. Continuing education/professional development training is designed to meet identified needs of counselors and other professionals who work with individuals with substance abuse problems. A technical assistance is a jointly planned consultation generally involving a series of contacts between the ATTCS and an outside organization/institution during which the ATTCS provides expertise and gives direction toward resolving a problem or improving conditions. A meeting is an ATTCS sponsored or co-sponsored event in which a group of people representing one or more agencies other than the ATTCS work cooperatively on a project, problem, and/or a policy.

Both a process and an outcome assessment will be conducted. The process component will describe the training and education needs of pre-service and currently practicing professionals, the types of events that participants receive through the ATTCS, and their satisfaction with services. The outcome component will focus on changes in clinical practice made by participants as a result of knowledge received.

Analysis of this information will assist CSAT in documenting the numbers and types of participants in ATTCS events, describing the extent to which participants improve in their clinical competency, and which method is most effective in disseminating knowledge to the various audiences. This type of information is crucial to support CSAT in complying with GPRA reporting requirements and will inform future development of knowledge dissemination activities.

The study design for trainees will include a description of each event, and a pre-post design that collects identical information at initiation of ATTCS courses/trainings, at the completion of the course/training, and again after 30 days. For technical assistance and meeting events, there will be a description of each event and demographic information will be collected from participants before the event. In addition, the study will collect satisfaction measures after each event and at 30-day follow-up using the required GPRA forms. Follow-up forms will be sent to a sample of 25% of participants at events. The chart below summarizes the annualized burden for this project.

Respondent type	Number of respondents	Average responses/respondent	Average Hours/response	Total burden hours
Students/Trainees	20,000	3	.25	15,000
Faculty/Trainers	200	1	.25	50
ATTCS Summary Reports	15	4	2.00	120
Total	20,215			15,170

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Registration Form for the National Registry of Effective Prevention Programs—(OMB No. 0930-0210; Revision)—Section 515(d) of the Public Health Service Act (42 U.S.C. 290bb-21) requires that the Director of SAMHSA's Center for Substance Abuse Prevention

(CSAP) establish a national data base providing information on programs for the prevention of substance abuse and specifies that the data base shall contain information appropriate for use by public entities and information appropriate for use by nonprofit private entities. Beginning in 1994, CSAP met this responsibility through the High Risk Populations Databank on programs for the prevention of substance abuse funded by direct CSAP grants. In 2000 CSAP expanded its information collection to include voluntary submission of descriptions of effective substance abuse prevention conducted by state and local governments, nonprofit entities, and the private sector.

CSAP has developed a template, accessed through a dedicated site on the World Wide Web, to enable practitioners who have evidence that their program reduces risk factors or increases protective factors pertaining to

substance abuse to nominate their own standardized program for the Registry. Each program that is nominated should have been standardized (including curriculum manuals, implementation manuals, videotapes, etc.), well implemented, and findings should derive from well designed research efforts. Program models nominated are

reviewed and rated by experts annually to be recommended to the field. CSAP is revising the Registration Form by eliminating collection of information pertaining to the National Prevention System.

CSAP promotes selected models by providing funds to support development of program materials for dissemination,

by connecting program developers with organizations able to help in the dissemination efforts, and by promoting model programs nationally through CSAP's State Incentive Grant recipients and regional Centers for Applied Prevention Technology. Annual burden estimates for the Registry are shown in the table below.

Type of submission	Number of respondents	Responses/ respondent	Hours/ response	Total burden hours
Complete	60	1	.90	54
Abbreviated	8	1	.25	2
Total	68			56

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Allison Herron Eydt, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: March 18, 2003.

Richard Kopanda,

Executive Officer, Substance Abuse and Mental Health Services Administration.

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with section 3506(c)(2)(A) of the Paperwork

Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: The Annual Census of Patient Characteristics in State and County

Mental Hospital Inpatient Services (0930-0093, Extension)—The Census, which is conducted by SAMHSA's Center for Mental Health Services (CMHS), is a complete enumeration of all State and county mental hospitals and collects aggregate information by age, gender, race/ethnic identity and diagnosis for each State on the number of additions during the year and resident patients who are physically present for 24 hours per day in the inpatient service at the end of the reporting year. First conducted in 1840, the Census has provided information throughout the years that is not available from any other sources. The Census is the primary means within CMHS for assessing de-institutionalization practices of State and county mental hospitals. The annual burden estimate is shown in the table below.

	Number of respondents	Responses/ respondent	Burden/ response (Hrs.)	Annual burden (Hrs.)
State Statisticians and Superintendents of State Mental Hospitals	52	1	2	104

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Information Collection To Be Submitted to the Office of Management and Budget (OMB) for Approval Under the Paperwork Reduction Act; Approval Procedures for Nontoxic Shot and Shot Coatings

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: The U.S. Fish and Wildlife Service will submit the collection of information listed below to OMB for approval under the provisions of the Paperwork Reduction Act. A summary of the information collection requirement is included in this notice. If you wish to obtain copies of the proposed information collection requirement, related forms, and explanatory material, contact the Service Information Collection Clearance Officer at the address listed below.
