BILLING CODE 3810-FF-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Schultz-Hanford Area Transmission Line Project

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of availability of Record of Decision (ROD).

SUMMARY: This notice announces the availability of the ROD to construct the proposed Schultz-Hanford Area Transmission Line Project in Douglas, Grant, Lincoln, and Spokane Counties, Washington, based on the Final Environmental Impact Statement for this project (DOE/EIS-0325, January 2003). The proposed action consists of constructing a new 500-kilovolt (kV) transmission line between the Schultz Substation north of Ellensburg, Washington, and a new substation, Wautoma Substation, 2 miles south of Highway 24 in Benton County, Washington, a distance of about 64 miles.

ADDRESSES: Copies of the ROD and EIS may be obtained by calling BPA toll-free at 1-888-276-7790. The ROD and EIS Summary are also available on the Transmission Business Line Web site at <http://www.transmission.bpa.gov/projects>.

FOR FURTHER INFORMATION CONTACT:

Nancy A. Wittpenn, Bonneville Power Administration—KEC-4, P.O. Box 3621, Portland, Oregon, 97208-3621; toll-free telephone number 1-800-282-3713; fax number 503-230-5699; or e-mail nawittpenn@bpa.gov.

SUPPLEMENTARY INFORMATION: BPA has decided to implement the Agency Preferred Alternative identified in the Schultz-Hanford Area Transmission Line Project Final EIS, with the exception of Option 1 of the Sickler-

Schultz Reroute. Due to landowner concerns, BPA will now implement Option 2 of the Sickler-Schultz Reroute. The Agency Preferred Alternative will primarily use 500-kV single-circuit steel lattice structures. Through an agricultural area near Mattawa, for approximately 9 miles, 500-kV double-circuit lattice structures will be used to hold the new 500-kV line and the existing Midway-Vantage 230-kV line. New right-of-way of 150 to 180 feet will be needed for the new line. As part of the Agency Preferred Alternative, BPA has decided to construct new and upgrade existing access roads; construct a new bay within the existing fenced yard of the Schultz Substation; re-route the existing Sickler-Schultz 500-kV transmission line; construct a new substation called Wautoma Substation, in Benton County; loop the existing Hanford-Ostrander 500-kV and Hanford-John Day 500-kV transmission lines through the Wautoma Substation; and install fiber optic cable between the Vantage Substation and the new Wautoma Substation, and the Vantage Substation and the Columbia Substation. All mitigation measures have been adopted and included with the ROD. A Mitigation Action Plan will be prepared to be included in the construction specifications to ensure mitigation measures are implemented.

Issued in Portland, Oregon, on March 17, 2003.

Stephen J. Wright,

Administrator and Chief Executive Officer.

SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. 93-275, 15 U.S.C. 761 *et seq.*) and the DOE Organization Act (Pub. L. 95-91, 42 U.S.C. 7101 *et seq.*) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. chapter

35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) under section 3507(a) of the Paperwork Reduction Act of 1995.

The petroleum marketing survey forms collect volumetric and price information needed for determining the supply of and demand for crude oil and refined petroleum products. These surveys provide a basic set of data pertaining to the structure, efficiency, and behavior of petroleum markets. These data are published by the EIA on its Web site, <http://www.eia.doe.gov>, as well as in publications such as the *Monthly Energy Review*, *Annual Energy Review*, *Petroleum Marketing Monthly*, *Petroleum Marketing Annual*, *Weekly Petroleum Status Report*, and the *International Energy Outlook*. EIA also maintains a 24-hour telephone hotline number, (202) 586-6966, for the public to obtain retail price estimates for on-highway diesel fuel and motor gasoline.

II. Current Actions

EIA will be requesting a three-year extension of approval to its petroleum marketing surveys with the following survey changes. The Form EIA-14 currently collects, at the national level, the weighted cost of crude oil as it is booked into the refinery. EIA proposes to collect this same price data at the Petroleum Administration for Defense District (PADD) level for more accurate measurement of refiner costs at the regional level.

Form EIA-182 collects data on the weighted average wellhead prices paid by the first purchasers to the crude oil producers. EIA proposes to consolidate low volume crude streams and begin publishing new crude streams which are supported by data. The smaller volume crude streams that EIA proposes to delete are not publishable at the state level. Proposed changes to the following states and areas are described below:

California: Delete the data collection elements for Huntington Beach, San Ardo, and Ventura crude streams and begin collection of the following new crude streams: Coalinga, Cymric, and Lost Hills.

California Outer Continental Shelf: Begin data collection on the Pescado crude stream.
