For public commenters, it is important to note that EPA’s policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA’s electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA’s electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA’s electronic public docket. Public comments that are mailed or delivered to the Docket will be scanned and placed in EPA’s electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA’s electronic public docket along with a brief description written by the docket staff.

Commenters should not submit electronically any confidential business information (CBI). An original and two copies of CBI must be submitted under separate cover to: Regina Magbie, RCRA CBI Document Control Officer, EPA Office of Solid Waste, 2800 Crystal Drive, 7th Floor, Cube 16, Washington, DC 22202. SUPPLEMENTARY INFORMATION: On October 30, 2002 (67 FR 210), EPA proposed to amend a variety of testing and monitoring requirements throughout the Resource Conservation and Recovery Act (RCRA) regulations. As noted in the proposal, the Agency wants to allow more flexibility when conducting RCRA-related sampling and analysis, by removing unnecessary required uses of methods found in “Test Methods for Evaluating Solid Waste, Physical/Chemical Methods,” also known as “SW-846,” and only retaining the requirement to use SW-846 methods when the method is the only one capable of measuring a particular property (*i.e.*, it is used to measure a required method-defined parameter). This is an important step towards a performance-based measurement system (PBMS), as part of the Agency’s efforts towards Innovating for Better Environmental Results. In addition, we proposed to: Withdraw the reactivity method guidelines from SW-846 Chapter Seven; amend the ignitability and corrosivity hazardous waste characteristic regulations by clarifying the use of certain methods; incorporate by reference Update IIIB to SW-846; add Method 25A for analyses conducted in support of certain RCRA air emission standards; and remove a confidence limit requirement for certain feedstream analyses conducted under the National Emission Standards for Hazardous Air Pollutants (NESHAP). Simultaneously, the Agency also announced the availability of a new guidance document for public comment entitled “RCRA

Waste Sampling Draft Technical Guidance.” The Agency believes the new guidance when used should make it easier and more cost effective to comply with affected regulations, without compromising human health or environmental protection. By extending the comment period to February 28, 2003, we are accommodating a request by several parties for additional time to prepare extensive relevant comments.

We will, as appropriate, address all public comments in a subsequent final deletion notice based on this notice of intent to delete. We will not institute a second comment period on this notice of intent to delete. Any parties interested in commenting must do so at this time.
