

agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection appear at the beginning and the end of this document. In addition OMB control numbers for EPA's regulations, after initial display in the final rule, are listed in 40 CFR part 9.

The following is a summary of the burden estimates taken from the ICR:

Respondents/affected entities: Any person seeking a tolerance action.

Estimated total number of potential respondents: 150.

Frequency of response: As needed.

Estimated total/average number of responses for each respondent: 1.

Estimated total annual burden hours: 258,900.

Estimated total annual burden costs: \$23,435,700.

Changes in the ICR Since the Last Approval: The total estimated annual respondent cost for this ICR has increased \$1,305,700 (from \$22,130,000 to \$23,435,700), due mainly to the update in the loaded hourly labor rates used to calculate the costs. This increase is explained more fully in the ICR.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: April 22, 2003.

Title: NSPS for Secondary Lead Smelters (40 CFR part 60, subpart L), (OMB Control Number 2060-0080, EPA ICR Number 1128.07). This is a request to renew an existing, approved collection that is scheduled to expire on June 30, 2003. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The NSPS for Secondary Lead Smelters, published at 40 CFR part 60, subpart L, were proposed on June 11, 1973, and promulgated on March 8, 1974. These standards apply to affected facilities at secondary lead smelters facilities including: pot furnaces of more than 250 kg (550 lb) charging capacity, blast (cupola) furnaces, and reverberatory furnaces that commenced construction or modification after June 11, 1973. This information is being collected to assure compliance with 40 CFR part 60, subpart L.

Owners or operators of affected facilities described must notify EPA of construction, reconstruction, modification, anticipated and actual startup dates, and results of performance tests. These facilities must

also maintain records of performance test results, startups, shutdowns, and malfunctions. In order to ensure compliance with the standards, adequate recordkeeping and reporting is necessary. This information enables the Agency to: (1) Identify the sources subject to the standard; (2) ensure initial compliance with emission limits; and (3) verify continuous compliance with the standard. Reporting and recordkeeping requirements on the part of the respondent are mandatory under section 114 of the Clean Air Act as amended and 40 CFR part 60.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Secondary Lead Smelters.

Estimated Number of Respondents: 25.

Frequency of Response: Initial startup, construction, reconstruction and modification.

Estimated Total Annual Hour Burden: 38 hours.

Estimated Total Capital and Operations & Maintenance (O & M) Annual Costs: None.

Changes in the Estimates: There is an increase of three hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR burdens. This is due to an increased recognition of the time required to perform some tasks. Labor rates have also increased.

Dated: April 21, 2003.

Oscar Morales,

Director, Collection Strategies Division.
