Annually, ten lactating female northern fur seals from the Pribilof Islands in Alaska will be captured, measured, outfitted with datalogging instrumentation, and released. The individuals will be tracked and recaptured, the datalogger removed and the animals subsequently released. Additionally, authorization for Level B Harassment of northern fur seals is requested for 50 pups, 50 breeding females, 25 mature males, and 50 immature males, annually. These activities will be authorized over five years. The results of this research will provide important information for management decisions regarding northern fur seals.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
