an interested person, or upon its own initiative, grant exemptions from the requirements of 10 CFR Part 55 when the exemptions are authorized by law and will not endanger life or property and are otherwise in the public interest. The exemption being requested for Crystal River is to alleviate potential scheduling difficulties associated with administering requalification examinations and completing the requalification program at the end of the 2004 calendar year. Moving the end of the requalification program to February 28, 2005, would: (1) Minimize the fall refueling outage impact on requalification examination development; (2) minimize the potential impact from any fall refueling outage extensions; (3) minimize the scheduling and resource impact from both the Thanksgiving and Christmas holidays; (4) minimize the potential scheduling and resource impact of any examination remediation or retesting requirements during the holidays; and (5) minimize the potential impact from future bargaining unit negotiations, which occur periodically in the fourth calendar quarter.

Although the 24-month schedule requirement of 10 CFR 55.59 at Crystal River would be exceeded, operator performance continues to be satisfactory, as demonstrated by the operators' strong performance during the recent end-of-cycle requalification examinations. Granting this exemption will allow Crystal River to continue with safe plant operations without undue hardship to plant personnel and Crystal River licensed operators.

4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 55.11, granting an exemption to the licensee from the schedule requirements in 10 CFR 55.59, by allowing Crystal River a one-time extension in the allowed time for completing the current licensed operator requalification program, is authorized by law and will not endanger life or property and is otherwise in the public interest. Therefore, the Commission hereby grants Florida Power Corporation an exemption on a one-time only basis from the schedule requirement of 10 CFR 55.59, to allow the completion date for the current licensed operator requalification program for the Crystal River Unit 3 Nuclear Generating Plant to be extended from December 31, 2004, to February 28, 2005. The next requalification program period would begin March 1, 2005, and continue for 24 months to February 28, 2007, with

successive periods running for 24 months.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (68 FR 25069).

This exemption is effective upon issuance and expires on February 28, 2005.

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission (NRC) has issued for public comment a proposed revision of a guide in its Regulatory Guide Series. Regulatory Guides are developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide is temporarily identified by its task number, DG–1079, which should be mentioned in all correspondence concerning this draft guide. Draft Regulatory Guide DG–1079, "Criteria for Power Systems for Nuclear Power Plants," is being developed to describe a method that is acceptable to the NRC staff for complying with the NRC's regulations for the design, operation, and testing of electric power
