Under sections 108 and 109 of the Clean Air Act, the purpose of the revised document is to provide an assessment of the latest scientific information on the effects of airborne particulate matter (PM) on the public health and welfare, for use in EPA's current review of the National Ambient Air Quality Standards (NAAQS) for PM.

DATES: Comments on the draft document must be submitted in writing no later than August 31, 2003. Send the written comments to the Project Manager for Particulate Matter, National Center for Environmental Assessment-RTP (B243-01), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711.

SUPPLEMENTARY INFORMATION: EPA is in the process of updating, and revising where appropriate, the document *Air Quality Criteria for Particulate Matter* as issued in 1996. Sections 108 and 109 of the Clean Air Act require that EPA carry out a periodic review and revision, where appropriate, of the air quality criteria and the NAAQS for "criteria" air pollutants such as PM. Details of EPA's plans for the review of the NAAQS for PM were initially announced in a previous **Federal Register** notice (62 FR 55201, October 23, 1997).

EPA made a First External Review Draft of the updated *Air Quality Criteria for Particulate Matter* available in 1999 for review by members of the public and the Clean Air Scientific Advisory Committee (CASAC) (64 FR 57884, October 27, 1999). Following that public review and a meeting of the CASAC in December 1999 (64 FR 61875, November 15, 1999), EPA revised the document in response to CASAC and public comments, as well as to reflect additional new studies on PM effects that were not available in time for the First External Review Draft.

In April 2001, EPA made a Second External Review Draft of *Air Quality Criteria for Particulate Matter* available for public and CASAC review (66 FR 18929, April 12, 2001). Following that public review and a second CASAC meeting in July 2001 (66 FR 34924, July 2, 2001), EPA again revised the document in response to CASAC and public comments and to reflect more new PM studies that had become available.
