SUPPLEMENTARY INFORMATION:

Title: Survey Instruments—

Quantitative Description of Potential Impacts of OCS Activities on Bowhead Whale Hunting Activities in the Beaufort Sea.

OMB Control Number: 1010-NEW.

Abstract: The Minerals Management Service (MMS) of the U.S. Department of the Interior (USDOI) is responsible for oil and gas leasing on the Outer Continental Shelf (OCS) under the OCS Lands Act of 1953, the OCS Lands Act Amendments of 1978 (OCSLA), and the National Environmental Policy Act (NEPA) of 1969. OCSLA and NEPA require assessment of the effects of OCS oil and gas activities on adjacent human and physical environments. Therefore, USDOI/MMS acquires and analyzes and/or oversees collection and analysis of environmental, socio-economic, and socio-cultural information relevant to OCS decisions and uses that information in Environmental Assessments (EA) and Environmental Impact Statements (EIS).

This study is responsive to concerns among North Slope Borough (NSB) residents that oil exploration and development activities in general, and OCS activities in particular, are having an adverse effect on whale hunting and Inupiat life. There are three general areas of concern. First are the worries over the physical effects of seismic testing; the movement of barges, aircraft, and other transport vessels; and the erection of platforms. Many think these disruptions alter the feeding and migration patterns of bowhead whales
