SUPPLEMENTARY INFORMATION: The Upper Colorado River Endangered Fish Recovery Program (Program) was established in 1988 by a cooperative agreement among the governors of Wyoming, Colorado, and Utah, Secretary of the Department of the Interior, and Administrator of the Western Area Power Administration for the purpose of recovering four endangered fish species endemic to the Colorado River Basin—the humpback chub (*Gila cypha*), bonytail (*Gila elegans*), Colorado pikeminnow (*Ptychocheilus lucius*), and razorback sucker (*Xyrauchen texanus*). In August 2002, the Service completed recovery goals for these species, which identify five threat factors that led to their decline. These factors, which include—(1) Destruction, modification, or curtailment of the species' habitat or range; (2) overutilization; (3) disease and predation; (4) inadequacy of existing regulatory mechanisms; and (5) other natural or manmade factors, must be removed or abated to ensure the species' recovery. The recovery goals specify that certain recovery actions be taken to achieve the demographic criteria necessary for the species' downlisting and eventual delisting. Flow modification, obstructions to fish passage, and the presence of competitive and predatory nonnative fishes are considered to present the most significant threats to recovery. Consistent with the recovery goals, Program participants developed a Management Plan for Endangered Fishes in the Yampa River Basin to facilitate recovery of listed fishes as water continues to be depleted from the river to serve the needs of the people of the Yampa Basin now and into the foreseeable future. This management plan identifies a package of recovery actions to be implemented in the Yampa River Basin, including instream flow augmentation, fish passage, and management of nonnative fish

populations. The Service proposes to enter into a cooperative agreement to implement the plan. This Federal action requires that the Service fulfill the requirements of the NEPA, for which an Environmental Assessment has been prepared.
